# **CURRENT INDEX TO STATISTICS: APPLICATIONS, METHODS AND THEORY**

*An annual computerized index to the statistical literature*

*Coverage*—Over 7,000 articles in “core” and “related” journals are indexed. Author index and index by key words. Example of subject index (complete reference to journal, volume, pages, etc., is given):

*Important word*

Asymptotic Properties of Non-linear Least Squares Estimators • R. I. Jennrich  
Interval Estimation of Non-linear Parametric Functions • Halpern, Mantel  
Interval Estimation of Non-linear Parametric Functions, II • M. Halpern  
On a Problem in Non-linear Prediction Theory • J. B. Robertson  
Convergence in Non-linear Regression • T. Tornheim  
Non-linear Regression with Minimal Assumptions • H. M. Wagner  
Non-linear  
Discrimination Among Mechanistic Models • G.E.P. Box  
New Analysis of Variance Model for Nonadditive Data • J. Mandel  
Simplified Experimental Design • M. J. Box

*Key word*

*Who should subscribe*—All individuals who spend any significant fraction of their time doing statistics. Anyone who spends more than *one hour per year* looking for an article on a particular topic in statistics or redeveloping some technique that already exists in the literature will find it cost effective to have a personal copy of this index.

*Editor*—James E. Gentle, IMSL, Inc.

*Subscription Rates*—Vols. 2-6 (1976-1980)  
Nonmember \$ 26.00; Member \$ 13.00

*Essays on the Prediction Process by Frank Knight*

This work concerns a new approach to continuous time random processes due originally to the author, but extended and consolidated by P. A. Meyer and others. It is a fluid and subjective approach, in distinction to the rigid and objective one prevalent in other treatments. This leads to a broad unification of method, and consequently to a setting of almost universal applicability. Each of the four essays contains a different aspect of the subject, without being exhaustive.

**Essay I. Introduction, Construction, and Fundamental Properties . . . .**

- 0. Introduction . . . . .
- 1. The Prediction Process of a Right-Continuous Process with Left Limits . . . . .
- 2. Prediction Spaces and Ray Topologies . . . . .
- 3. A View Toward Applications . . . . .

References . . . . .

**Essay II. Continuation of an Example of C. Dellacherie . . . . .**

- 1. The Process  $R_t$  . . . . .
- 2. The Prediction Process of  $R_t$  . . . . .
- 3. Connections With the General Prediction Process . . . . .

References . . . . .

**Essay III. Construction of Stationary Strong-Markov Transition Probabilities . . . . .**

References . . . . .

**Essay IV. Application of the Prediction Process to Martingales . . . . .**

- 0. Introduction . . . . .
- 1. The Martingale Prediction Spaces . . . . .
- 2. Transition to the Initial Setting: The Levy System of a Process . . . . .
- 3. On Continuous Local Martingales . . . . .

References . . . . .

# THE ANNALS OF PROBABILITY

Vol. 10

August 1982

No. 3

## Special Invited Paper

Percolation theory ..... JOHN C. WIERMAN

## Articles

- Invariant measures for the zero range process ..... ENRIQUE DANIEL ANDJEL  
Optimal triangulations of random samples in the plane ..... J. MICHAEL STEELE  
Wandering random measures in the Fleming-Viot model  
DONALD A. DAWSON AND KENNETH J. HOCHBERG  
Large deviations for boundary crossing probabilities ..... D. SIEGMUND  
On strongly unimodal infinitely divisible distributions ..... MAKOTO YAMAZATO  
Operator-stable laws: Multiple exponents and elliptical symmetry  
J. P. HOLMES, WILLIAM N. HUDSON AND J. DAVID MASON  
On the increments of Wiener and related processes ..... P. RÉVÉSZ  
On the existence of natural rate of escape functions for infinite dimensional Brownian  
motions ..... DENNIS D. COX  
Limit theorems and inequalities for the uniform empirical process indexed by intervals  
GALEN R. SHORACK AND JON A. WELLNER  
On limiting distributions of intermediate order statistics from stationary sequences  
VERNON WATTS, HOLGER ROOTZÉN AND M. R. LEADBETTER  
A Berry-Esseen bound for an occupancy problem  
M. P. QUINE AND J. ROBINSON  
Exact convergence rates in some martingale central limit theorem ..... E. BOLTHAUSEN  
Almost sure invariance principles for weakly dependent vector-valued random variables  
HEROLD DEHLING AND WALTER PHILIPP  
Decoupling inequalities for stationary Gaussian processes  
ABEL KLEIN, LAWRENCE J. LANDAU AND DAVID S. SHUCKER  
A generalization of stochastic integration with respect to semimartingales ..... M. EMERY  
A limit theorem for slowly increasing occupation times ..... YUJI KASAHARA  
The maximum term and first passage times for autoregressions ..... MARK FINSTER  
Optimal stopping on autoregressive schemes ..... MARK FINSTER  
Laws of large numbers for sums of extreme values ..... DAVID M. MASON  
Some concepts of negative dependence  
HENRY W. BLOCK, THOMAS H. SAVITS AND MOSHE SHAKED  
On the identifiability of multivariate life distribution functions  
NAFTALI A. LANGBERG AND MOSHE SHAKED  
Some results on distributions arising from coin tossing ..... JAKOB I. REICH  
When do weighted sums of independent random variables have a density—some results  
and examples ..... JAKOB I. REICH  
On upper and lower bounds for the variance of a function of a random variable  
THEOPHILOS CACOULLOS  
Joint continuity of Gaussian local times ..... JACK CUZICK AND JOHANNES P. DUPREEZ

## Short Communications

- Continuity of Gaussian local times ..... JACK CUZICK  
The XYZ conjecture and the FKG inequality ..... L. A. SHEPP  
Conditional generalizations of strong laws which conclude the partial sums converge almost  
surely ..... T. P. HILL  
On a general asymptotic independence result in statistics ..... BO BERGMAN  
A renewal theorem for an urn model ..... PRANAB KUMAR SEN  
On the expansion for expected sample size in nonlinear renewal theory  
CHARLES HAGWOOD AND MICHAEL WOODROOFE  
Structure of a class of operator-selfdecomposable probability measures  
ZBIGNIEW J. JUREK  
Stable laws of index  $2^{-n}$  ..... S. S. MITRA  
Probabilistic version of a curvature formula ..... VLADIMIR DROBOT  
A log log law for minimal uniform spacings ..... LUC DEVROYE  
Rates of escape of random walks ..... PHILIP S. GRIFFIN  
Bayes estimators and ergodic decomposability with an application to Cox processes  
E. GLÖTZL AND A. WAKOLBINGER  
A note on conditional distributions and orthogonal measures ..... R. J. GARDNER  
Orthogonal measures: An example ..... DOROTHY MAHARAM

## Directions in Time Series

### Table of Contents

#### Keynote Address

*Can We Predict Where "Time Series" Should Go Next?* John W. Tukey

#### Time Series Models

*Parametric Time Series with Some Applications* George E. P. Box

*Maximum Likelihood Estimation for Vector Autoregressive Moving Average Models* T. W. Anderson

#### Computer Packages and Graphics

*What Will Your Time Series Analysis Computer Package Do?* David J. Pack

*Time Series Modeling, Spectral Analysis, and Forecasting* Emanuel Parzen

*Some Remarks on Time Series Graphics* William S. Cleveland and Douglas M. Dunn

#### Econometric Models

*Some Recent Developments in Seasonal Adjustment* David A. Pierce

Comments. John Geweke

*On the Synthesis of Time Series and Econometric Models* C. W. J. Granger

Comments. John Geweke

Comments. Kenneth F. Wallis

#### Control Theory and Engineering Applications

*On the Identification of State Space Models and Their Use in Control* Hirotugu Akaike

*System Identification, Kalman Filtering, and Stochastic Control* M. B. Priestley

*Self-Tuning Algorithms for Control, Prediction and Smoothing* Bjorn Wit-tenmark

#### Robust Methods

*Robust Estimation of Autoregressive Models* R. Douglas Martin

Comments. Robert B. Miller

#### Continuous Processes and Periodic Models

*Continuous Model Fitting from Discrete Data* P. M. Robinson

Comments. David A. Dickey

*Some Recent Advances in Autoregressive Processes* Marcello Pagano

Comments. Herbert T. Davis

List Price ..... \$20.00

(Members) ..... \$15.00
