

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

The 1980 Wald Memorial Lectures

On adaptive estimation	P. J. BICKEL	647
Articles		
Small sample asymptotic expansions for multivariate M -estimates	CHRISTOPHER FIELD	672
Maximum likelihood estimation of isotonic modal regression	THOMAS W. SAGER AND RONALD A. THISTED	690
An algorithm for isotonic regression for two or more independent variables	RICHARD L. DYKSTRA AND TIM ROBERTSON	708
Optimal estimation of a general regression function	P. W. MILLAR	717
Towards a frequentist theory of upper and lower probability	PETER WALLEY AND TERRENCE L. FINE	741
Large sample point estimation: a large deviation theory approach	JAMES C. FU	762
Nonparametric estimation in renewal processes	Y. VARDI	772
Time series discrimination by higher order crossings	BENJAMIN KEDEM AND ERIC SLUD	786
On the estimation of a probability density function by the maximum penalized likelihood method	B. W. SILVERMAN	795
Consistency of two nonparametric maximum penalized likelihood estimators of the probability density function	V. K. KLONIAS	811
Towards a calculus for admissibility	ANDRZEJ KOZEK	825
General admissibility and inadmissibility results for estimation in a control problem	JAMES O. BERGER, L. MARK BERLINER AND ASAD ZAMAN	838
Improving upon standard estimators in discrete exponential families with applications to Poisson and negative binomial cases	JIUNN TZON HWANG	857
Minimax confidence sets for the mean of a multivariate normal distribution	JIUNN TZON HWANG AND GEORGE CASELLA	868
Tests with parabolic boundary for the drift of a Wiener process	BROOKS FEREBEE	882
Asymptotic expansions for the error probabilities of some repeated significance tests	MICHAEL WOODROOFE AND HAJIME TAKAHASHI	895
Bounded regret of a sequential procedure for estimation of the mean	Y. S. CHOW AND A. T. MARTINSEK	909
Analysis of time series from mixed distributions	P. M. ROBINSON	915
Autocorrelation, autoregression and autoregressive approximation	AN HONG-ZHI, CHEN ZHAO-GUO AND E. J. HANNAN	926
Minimaxity of the method of regularization on stochastic processes	KER-CHAU LI	937
Detection of multivariate normal outliers	STEVEN J. SCHWAGER AND BARRY H. MARGOLIN	943
Distributions of maximal invariants using quotient measures	STEEN ANDERSSON	955
Minimal complete classes of tests of hypotheses with multivariate one-sided alternatives	JOHN I. MARDEN	962
A comment on best invariant predictors	YOSHIKAZU TAKADA	971
An exponential subfamily which admits UMPU tests based on a single test statistic	SHAUL K. BAR-LEV AND BENJAMIN REISER	979
Quick consistency of quasi maximum likelihood estimators	THOMAS PFAFF	990
Short Communications		
Convergence of Simar's algorithm for finding the maximum likelihood estimate of a compound Poisson process	DANKMAR BÖHNING	1006
A note on the minimax estimation of the Poisson intensity function	ALBERT Y. LO	1009
Estimation of the non-centrality parameter of a Chi squared distribution	K. M. LAL SAXENA AND KHURSHED ALAM	1012
Stein's paradox is impossible in problems with finite sample space	SAM GUTMANN	1017
A characterization of the multivariate Pareto distribution	P. E. JUPP AND K. V. MARDIA	1021
A Bayes but not classically sufficient statistic	D. BLACKWELL AND R. V. RAMAMOORTHI	1025
On the E-optimality of PBIB designs with a small number of blocks	GREGORY M. CONSTANTINE	1027
Notes and Corrections		
Editor's correction to "Transformation theory: How normal is a family of distributions?"	BRADLEY EFRON	1032

Vol. 10, No. 3—September 1982

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

Mark Kac, Rockefeller University, New York, New York 10021

President-Elect:

Patrick Billingsley, Department of Statistics, University of Chicago, Chicago, Illinois 60637

Past President:

Peter Bickel, Department of Statistics, University of California, Berkeley, California 94720

Executive Secretary:

Kjell Doksum, Department of Statistics, University of California, Berkeley, California 94720

Treasurer:

Heebok Park, Department of Statistics, California State University, Hayward, California 94542

IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

Program Secretary:

Richard Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *Annals of Statistics*

David V. Hinkley, Department of Applied Statistics, University of Minnesota, St. Paul Campus, St. Paul, Minnesota 55108

Editor: *Annals of Probability*

Harry Kesten, Department of Mathematics, Cornell University, Ithaca, N.Y. 14853

Managing Editor:

Jagdish S. Rustagi, Department of Statistics, The Ohio State University, Columbus, Ohio 43210

Membership. Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$37.00 per year for all members. Special rates of \$17.00 per year are available to students. The dues are approximately twenty five percent higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer at the Business Office.

Subscription Rates. Current volumes (four issues per calendar year) of the *Annals of Probability* are \$48.00. Single issues are \$13.00 each. Current volumes (four issues per calendar year) of the *Annals of Statistics* are \$55.00. Single issues are \$15.00 each. Members of the Institute of Mathematical Statistics pay different rates (see above). Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volume 1 through 43) may be purchased from the Treasurer.

The Annals of Statistics. Volume 10, Number 3, September 1982. Published in March, June, September, and December by The Institute of Mathematical Statistics, IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545.

Mail to the *Annals of Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Hayward, California and at additional mailing offices

Copyright © 1982 by the Institute of Mathematical Statistics

NOTICE

Beginning with the calendar year 1982, the two journals of The Institute of Mathematical Statistics will be printed quarterly. The total numbers of pages per volume will be approximately the same as before. Months of publication for 1982 are as follows.

Annals of Statistics: March, June, September and December

Annals of Probability: February, May, August and November

ANNALS OF PROBABILITY

RONALD PYKE, 1972-1975
PATRICK BILLINGSLEY, 1976-1978
R. M. DUDLEY, 1979-1981

EDITORIAL POLICY

The main purpose of the *Annals of Statistics* and the *Annals of Probability* is to publish contributions to the theory of statistics and probability and to their applications. The emphasis is on importance and interest, not formal novelty and correctness. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

NOTICE

Manuscripts submitted for the *Annals of Statistics* should be sent to the Editor at the following address:

Until December 31, 1982:

David V. Hinkley
Department of Applied Statistics
University of Minnesota
1994 Buford Avenue
St. Paul, Minnesota 55108

After January 1, 1983:

Michael D. Perlman
Department of Statistics
University of Washington
Seattle, Washington 98195

"SURE, GROUP LIFE INSURANCE FOR A NEW FAMILY IS A GREAT IDEA— BUT RIGHT NOW, HENRY?"

Promising to buy life insurance isn't part of the marriage vows, but perhaps it should be.

After all, life insurance protection is a *must* for you and your family and— usually—an expensive must!

But then there is our low-cost Group Life Insurance with *group buying power* that can get you a lot more protection for the entire family—kids, too—for less money.

And if you change jobs on your way to success, your insurance goes with you every time... *automatically*.

Learn about the "better" buy in Group Life Insurance. Mail the coupon *today*. Promise?

Or, call today, toll-free

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with three additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

Submission of Reference Papers. Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title and Abbreviated Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," with the running head "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Summary. Each manuscript is required to contain a summary, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

Key Words. Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; Secondary—. Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero", "ell" and "one"; "epsilon" and "element of"; "kappa" and "kay," etc. Indicate also when special type is required (Greek, German, script, bold-face, etc.); other letters will be set in italics. Acronyms should be introduced sparingly.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$ or

$1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{b^c}

and $a_{b,c}$, respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Wilks, S.S. (1938). The large-sample distribution of the likelihood ratio for testing composite hypotheses. *Ann. Statist.* 1 60-62.

In textual material, the format "... Wilks (1938) ..." should be used. Multiple references can be distinguished as "... Wilks (1938a) ..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Proofs. Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)
