

# THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

**The 1985 Rietz Lecture**

Advances in pattern theory . . . . . ULF GRENANDER 1

**Articles**

Graphical models for associations between variables, some of which are qualitative and some quantitative . . . . . S. L. LAURITZEN AND N. WERMUTH 31  
 Projection-based approximation and a duality with kernel methods  
 DAVID L. DONOHO AND IAIN M. JOHNSTONE 58  
 Uniformly powerful goodness of fit tests . . . . . ANDREW R. BARRON 107  
 A stochastic minimum distance test for multivariate parametric models  
 R. BERAN AND P. W. MILLAR 125  
 Bootstrap and randomization tests of some nonparametric hypotheses  
 JOSEPH P. ROMANO 141  
 Second order and  $L^p$ -comparisons between the bootstrap and empirical Edgeworth expansion methodologies . . . . . RABI BHATTACHARYA AND MAHER QUMSIYEH 160  
 A Berry-Esseen bound for functions of independent random variables  
 KARL O. FRIEDRICH 170  
 On Hotelling's formula for the volume of tubes and Naiman's inequality  
 IAIN JOHNSTONE AND DAVID SIEGMUND 184  
 On the structure of transformation models . . . . . NIELS CHRISTIAN BANG JESPERSEN 195  
 Complete class results for hypothesis testing problems with simple null hypotheses . . . . . LAWRENCE D. BROWN AND JOHN I. MARDEN 209  
 On the admissibility and consistency of tests for homogeneity of variances  
 ARTHUR COHEN AND JOHN I. MARDEN 236  
 Universal domination and stochastic domination:  $U$ -admissibility and  $U$ -inadmissibility of the least squares estimator  
 LAWRENCE D. BROWN AND JIUNN T. HWANG 252  
 All admissible linear estimators of the vector of gamma scale parameters with application to random effects models  
 ROGER H. FARRELL, WITOLD KLONECKI AND STEFAN ZONTEK 268  
 Empirical processes based upon residuals from errors-in-variables regressions  
 STEPHEN M. MILLER 282  
 Spherical regression with errors in variables . . . . . TED CHANG 293  
 Spherical regression for concentrated Fisher-von Mises distributions  
 LOUIS-PAUL RIVEST 307  
 Power comparisons for invariant variance ratio tests in mixed ANOVA models  
 PETER H. WESTFALL 318  
 Minimax properties of  $M$ -,  $R$ - and  $L$ -estimators of location in Lévy neighbourhoods . . . . . JOHN COLLINS AND DOUGLAS WIENS 327  
 On  $M$ -processes and  $M$ -estimation . . . . . A. H. WELSH 337  
 Adaptive  $L$ -estimation for linear models . . . . . STEPHEN PORTNOY AND ROGER KOENKER 362  
 Asymptotics with increasing dimension for robust regression with applications to the bootstrap . . . . . ENNO MAMMEN 382  
 The bracketing condition for limit theorems on stationary linear processes . YUZO HOSOYA 401  
 Testing for a unit root nonstationarity in multivariate autoregressive time series . . . . . NICOLAOS G. FOUNTIS AND DAVID A. DICKEY 419  
 Inequalities for a class of positively dependent random variables with a common marginal . . . . . Y. L. TONG 429

**Short Communications**

A counterexample to a correlation inequality in finite sampling  
 KENNETH S. ALEXANDER 436  
 The price of bias reduction when there is no unbiased estimate  
 HANI DOSS AND JAYARAM SETHURAMAN 440  
 On Edgeworth expansions in the mixture cases . . . . . G. J. BABU AND K. SINGH 443  
 On the maximum number of constraints in orthogonal arrays  
 A. HEDAYAT AND J. STUFKEN 448

**Correction**

Asymptotic local minimaxity in sequential point estimation . . . . . MICHAEL WOODROOFE 452

Vol: 17, No. 1—March 1989

# INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.*

---

## OFFICERS AND EDITORS

- President:** Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961
- President-Elect:** Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907
- Past President:** Bradley Efron, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
- Executive Secretary:** Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943
- Treasurer:** Jessica Utts, Division of Statistics, University of California, Davis. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545
- Program Secretary:** Lynne Billard, Department of Statistics, University of Georgia, Athens, Georgia 30602
- Editor, *The Annals of Statistics*:** Arthur Cohen, Department of Statistics, Busch Campus, Rutgers University, New Brunswick, New Jersey 08903
- Editor, *The Annals of Probability*:** Peter Ney, Department of Mathematics, Van Vleck Hall, University of Wisconsin, 480 Lincoln Drive, Madison, Wisconsin 53706
- Executive Editor, *Statistical Science*:** Carl N. Morris, Statistical Sciences Center, RLM 8.100, University of Texas, Austin, Texas 78712
- Editor, *The IMS Bulletin*:** George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6
- Editor, *The IMS Lecture Notes—Monograph Series*:** Robert J. Serfling, Department of Mathematical Sciences, Johns Hopkins University, Baltimore, Maryland 21218
- Managing Editor:** Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302

---

**Journals.** The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

**Individual, Institutional and Corporate Memberships.** All individual members receive *The IMS Bulletin* for a basic annual dues rate of \$30. Each member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* (\$5), one *Annals* (\$15) or both *Annals* (\$25). Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries and retired members. Retired members may also elect to receive the *Bulletin* only for \$12. *Institutional memberships* are available to nonprofit organizations at \$270 per year and *corporate memberships* are available to other organizations at \$585 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

**Individual and General Subscriptions.** Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by and mailed to an individual. Individual subscriptions for 1989 are available to both *Annals* and *Statistical Science* (\$96), one *Annals* and *Statistical Science* (\$60), both *Annals* (\$72), one *Annals* (\$45), *Statistical Science* (\$30) and *The IMS Bulletin* (\$20). *General subscriptions* are for libraries, institutions and any multiple-readership use. For 1989, all general subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. General subscriptions for 1989 are available to both *Annals* and *Statistical Science* (\$180), one *Annals* and *Statistical Science* (\$105), *Statistical Science* only (\$45) and *The IMS Bulletin* (\$30). Air mail rates for overseas delivery of general subscriptions are \$50 per title.

**Permissions policy.** Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 0090-5364/89 \$5.00 + .00.

**Correspondence.** Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Managing Editor (production).

***The Annals of Statistics* (ISSN 0090-5364)**, Volume 17, Number 1, March, 1989. Published in March, June, September and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

## EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of *The Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to *The Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

---

## ADDITIONAL GUIDELINES FOR PREPARING PAPERS FOR THE ANNALS OF STATISTICS

1. The introduction and/or abstract should contain a statement pertaining to the statistical importance of the paper. Sometimes this is clear when reference is made to previous work. Statistical importance, not mathematical complexity for its own sake, is the prime criterion for publication.
2. The introduction should be thorough and contain clear yet nontechnical descriptions of the important results. Furthermore, the introduction should give a clear indication of where in the paper the main results and conclusions are to be found.
3. In papers where the formulation is general and mathematically abstract, when appropriate, the author should provide a short development of a special case, an example, or an illustration of the results. If possible, the special case or example should be in the introduction or shortly thereafter.
4. The manuscript should be proofread thoroughly before being submitted. Manuscripts with many typographical errors will cause unnecessary delays and may require resubmission.

# THE ANNALS OF STATISTICS

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of *The Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) **Four copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

**Submission of Reference Papers.** Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

**Abbreviated Title.** An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

**Affiliation.** Indicate your present institutional affiliation as you would like it to appear.

**Summary.** Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes.** Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

**Title Page Footnotes.** Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.  
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be

found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

**Identification of Symbols.** Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and  $(2\pi)^{-1}$

or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are preferred

to  $a^{b^c}$  and  $a_{b^c}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format "... Keifer (1976)..." should be used. Multiple references can be distinguished as "... Kiefer (1976a)..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

**Addresses.** The permanent address of each author should be typed following the references.

**Galley Proofs.** The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.

**Correspondence.** All correspondence with the Editor must refer to the manuscript number of the paper. This number will be on the card sent to the author acknowledging receipt of the article.
