

The Institute of Mathematical Statistics
announces publication of the

**CUMULATIVE INDEX TO
IMS SCIENTIFIC JOURNALS
1960–1989**

- Indexes the following journals:

The Annals of Mathematical Statistics (Vols. 31-43, 1960-1972)
The Annals of Statistics (Vols. 1-17, 1973-1989)
The Annals of Probability (Vols. 1-17, 1973-1989)
Statistical Science (Vols. 1-4, 1986-1989)
Selected articles from *The IMS Bulletin* (Vols. 16-18, 1987-1989)

- Follows the same format as the *Current Index to Statistics*,
including author and subject indexes:

Author index lists each author of each article. Lists are chronological
for each author.

Subject index lists each article according to important words in its title
and key words not appearing in the title.

Published by the Institute of Mathematical Statistics. Publication of the *Cumulative
Index to IMS Scientific Journals* is expected in early 1991.

List price \$50
IMS member price \$15

Orders are now being accepted at the above prices, with shipping upon availability.
Order prepaid from:

IMS Life Insurance
Is as Individual as You Are.

Our Term Life Insurance Plan is custom-designed for members of our profession. What's more, each policy can then be tailored to suit your individual needs. As these needs change, so can the policy—and it can stay with you no matter how often you change jobs.

Our group purchasing power helped us to negotiate top quality insurance, at a very low price.

To take advantage of this benefit of membership, call 1-800-424-9883 for further details (in Washington, D.C. call 457-6820).

IMS INSURANCE
Designed by Members.
For Members.

The IMS Life Plan is underwritten by New York Life Insurance Company, New York, New York 10010 on form number GMR

NEW FROM WILEY IN 1991

ENVIRONMETRICS

An international journal for applied statisticians
in the field of environmental science

EDITORS

A.H. El-Shaarawi
National Water Research
Institute,
Burlington, Ontario,
Canada

I.B. MacNeill
Department of Statistical
and Actuarial Sciences,
The University of
Western Ontario,
London, Ontario, Canada

AIMS AND SCOPE

Environmetrics is a multidisciplinary journal concerned with the development and application of statistical methodology in the environmental sciences. The scope covers a wide range of methodological topics including sampling design, statistical modelling, methods of data analysis and interpretation, statistical quality control, risk assessment, time series methods, multivariate analysis, and other statistical methods with application to such areas as:

- water and air quality
- regulation and control
- waste management
- transboundary pollution
- health aspects of pollution
- risk analysis
- monitoring
- field and laboratory quality control
- climatic change

In addition to publishing significant research papers, *Environmetrics* publishes review and survey papers in the aforementioned areas, and articles on algorithms and computer software relevant to environmetrics.

14 INVARIANT MEASURES ON GROUPS AND THEIR USE IN STATISTICS by Robert A. Wijsman

A discussion of distributions in statistical models with groups of invariance transformations.

This monograph deals with problems concerning distributions in statistical models in which there is a group of invariance transformations. The methods presented make use of mathematical tools that involve the interplay between groups and integration. The author demonstrates by examples the statistical usefulness of these methods and presents a systematic account of their mathematical background.

15 ANALYTIC STATISTICAL MODELS by Ib M. Skovgaard

An introduction to analytic statistical models.

This monograph introduces a class of statistical models (the analytic models) which is sufficiently well behaved to satisfy regularity conditions of the type typically met in theorems of asymptotic statistical inference, and at the same time sufficiently rich to contain many of the commonly used statistical models, including the (sufficiently smooth) curved exponential families. The author defines the class of analytic models, derives its basic mathematical and probabilistic properties, shows that it contains a wide range of common statistical models, and demonstrates its applicability in asymptotics.

16 TOPICS IN STATISTICAL DEPENDENCE edited by H. W. Block, A. R. Sampson, & T. H. Savits

Proceedings of the Symposium on Dependence in Probability and Statistics, Somerset, Pennsylvania, August 1987.

This was the first symposium dedicated solely to research in the area of positive and negative dependence for the modeling and analysis of multivariate data. Many researchers in this broad and diverse field contribute 41 papers to this volume.
