

# How Many Candles Were On Your Cake The Last Time You Thought About Buying Insurance?

Face it — it's been a long time. Styles have changed. So has your family, maybe even your job. And most likely, the insurance you bought then isn't enough to cover you today. That's why you need coverage that you can easily update as your life changes — IMS Term Life Insurance.

## **We Understand You.**

Finding insurance that's right for you can be difficult and time consuming. But we've done the work for you. Through our research, we've found a Term Life Plan designed to help members of our profession provide for the future of their families. What's more, with insurance purchased through IMS, you can be sure that the plan is constantly being evaluated to better meet the needs of our members.

## **We're Flexible.**

Updating your insurance doesn't

have to be a hassle. With our Term Life Plan, as your needs change, so can

your coverage. Insurance through your association is designed to grow with you — it even moves with you when you change jobs.

## **We're Affordable.**

What good would all these benefits be if no one could afford them? That's why we offer members the additional benefit of reasonable rates, negotiated using our group purchasing power. Find out more about Term Life through IMS; call 1 800 424-9883 or, in Washington, D.C., (202) 457-6820, between 8:30 a.m. and 5:30 p.m. Eastern Time.

## **IMS Insurance**

Designed for the way you live today.  
And tomorrow.

*The Annual Index to the  
Statistical Literature of the World*

**Current Index to Statistics  
APPLICATIONS, METHODS AND THEORY  
VOLUME 17 (1991)–NOW AVAILABLE**

- Approximately 8900 articles from journals and books indexed for 1991.
- Complete coverage of 85 core journals in statistics, probability and related fields. Selected articles indexed from many other journals.
- Subject index lists articles alphabetically according to each *important word* in their titles, and according to carefully selected *key words* not appearing in titles.
- Author index lists each article under the name of the author.
- Reasonable prices:

<b>Volumes 1-11 and 16-18</b>	<b>1992 Price</b>	<b>1993 Price</b>
<b>IMS/ASA Members</b>	<b>\$20</b>	<b>\$25</b>
<b>Individual Nonmembers</b>	<b>\$40</b>	<b>\$50</b>
<b>Institutional Nonmembers</b>	<b>\$60</b>	<b>\$75</b>

The 1993 price will apply to orders received after December 31, 1992. Beginning in 1993, Nonmember Institutions in certain countries, reported by the World Bank as having low per-capita GNP (ask for list), may order at the Individual Nonmember price.

**Special inventory-reduction sale on Volumes 12-15 effective for *all* purchases of excess copies through November 1993: \$10 per copy.**

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association, Volumes 1-17 are available now at the above prices. Volume 18 (articles published in 1992) is expected in Autumn 1993. Please specify the applicable rate and volume number(s) desired. Order prepaid from:

# Weighted Empiricals and Linear Models

by Hira L. Koul

An empirical process that assigns possible different non-random (random) weights to different observations is called a *weighted (randomly weighted) empirical process*. These processes are as basic to linear regression and autoregression models as the ordinary process is to one sample models. However, their usefulness in studying linear regression and autoregression models has not been fully exploited. This monograph addresses this question to a large extent.

## Contents

### Introduction

Weighted empirical processes; M-, R-, and scale estimators; Minimum distance estimators and goodness-of-fit tests; Randomly weighted empirical processes

### Asymptotic Properties of Weighted Empiricals

Introduction; Weak convergence; Asymptotic uniform linearity (A.U.L.) of residual w.e.p.'s; Some further probabilistic results for w.e.p.'s

### Linear Rank and Signed Rank Statistics

Introduction; AUL of linear rank statistics; AUL of linear signed rank statistics; Weak convergence of rank and signed rank w.e.p.'s

### M, R, and Some Scale Estimators

Introduction; M-estimators; Distribution of some scale estimators; R-estimators; Estimation of  $Q(f)$

### Minimum Distance Estimators

Introduction; Definitions of M. D. estimators; Finite sample properties and existence; Asymptotics of minimum dispersion estimators: A general case; Asymptotic uniform quadraticity; Asymptotic distributions, efficiencies, and robustness

### Goodness-of-Fit Tests for the Errors

Introduction; The supremum distance tests;  $L_2$ -distance tests; Testing with unknown scale; Testing for symmetry of the errors

### Autoregression

Introduction; Asymptotic uniform linearity of  $W_n$  and  $F_n$ ; GM- and R-estimators; M.D. Estimation; Goodness-of-fit testing

### Appendix

### Bibliography

<b>Pages</b> .....	<b>x+264</b>
<b>List price</b> .....	<b>\$30</b>
<b>IMS member price</b> .....	<b>\$18</b>

## Stochastic Inequalities

Moshe Shaked and Y. L. Tong, Editors

Proceedings of the Joint AMS-IMS-SIAM Summer Research Conference on Stochastic Inequalities, Seattle, Washington, July 1991. The conference focused on the recent developments in the theory and applications of stochastic inequalities with special emphasis on convexity-related, majorization-related inequalities and stochastic convexity; dependence-related probability and moment inequalities; inequalities in multivariate distributions and multivariate analysis; inequalities in reliability theory and queuing theory; and, applications in business and economics, operations research, and other related fields. This volume is a collection of papers based on the lectures given at the conference.

### Contents

*Inequalities for rare events in time-reversible Markov chains I* by D. J. Aldous & M. Brown; *Skewness and kurtosis orderings: An introduction* by B. C. Arnold & R. A. Groeneveld; *Stochastic inequalities for a redundancy enhancement to a series or parallel system* by P. J. Boland; *Some remarks on a notion of positive dependence, association, and unbiased testing* by A. Cohen & H. B. Sackrowitz; *Further aspects of the comparison of two groups of ranked objects by matching in pairs* by H. A. David & J. Liu; *Inequalities for the parameters  $\lambda(F)$ ,  $\mu(F)$  with applications in nonparametric statistics* by C. Dorado & M. Hollander; *Orderings arising from expected extremes, with an application* by P. J. Downey & R. S. Maier; *A group action on covariances with applications to the comparison of linear normal experiments* by M. L. Eaton; *The role of a module in the failure of a system* by E. El-Newehi & J. Sethuraman; *Extreme order statistics for a sequence of dependent random variables* by J. Glaz; *Partitioning inequalities in probability and statistics* by T. P. Hill; *Matrix extremes and related stochastic bounds* by D. R. Jensen; *Generalized majorization orderings and applications* by H. Joe; *Multivariate majorization by positive combinations* by H. Joe & J. Verducci; *Covariance spaces for measures on polyhedral sets* by J. H. B. Kemperman & M. Skibinsky; *Hyperbolic-concave functions and Hardy-Littlewood maximal functions* by R. P. Kertz & U. Rösler; *Lower bounds on multivariate distributions with preassigned marginals* by S. Kotz & J. P. Seeger; *Dependence of stable random variables* by M.-L. Ting Lee, S. T. Rachev, & G. Samorodnitsky; *A multivariate stochastic ordering by the mixed descending factorial moments with applications* by C. Lefevre & P. Picard; *Allocation through stochastic Schur convexity and stochastic transposition increasingness* by L. Liyanage & J. George Shanthikumar; *Extremal problems for probability distributions: A general method and some examples* by L. Mattner; *Concentration inequalities for multivariate distributions II: Elliptically contoured distributions* by M. D. Perlman; *Inequalities on expectations based on the knowledge of multivariate moments* by A. Prekopa; *On FKG-type and permanental inequalities* by Y. Rinott & M. Saks; *Optimal stopping values and prophet inequalities for some dependent random variables* by Y. Rinott & E. Samuel-Cahn; *Some applications of monotone transformations in statistics* by A. R. Sampson; *Secretary problems as a source of benchmark bounds* by S. M. Samuels; *Comparison of experiments of some multivariate distributions with a common marginal* by M. Shaked & Y. L. Tong; *On the bias of the jackknife estimate of variance* by R. A. Vitale
