

# THE ANNALS of STATISTICS

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

- Object oriented data analysis: Sets of trees . . . . . HAONAN WANG AND J. S. MARRON 1849
- Computer model validation with functional output . . . . . M. J. BAYARRI, J. O. BERGER,  
J. CAFFEO, G. GARCIA-DONATO, F. LIU, J. PALOMO,  
R. J. PARTHASARATHY, R. PAULO, J. SACKS AND D. WALSH 1874
- Goodness-of-fit testing and quadratic functional estimation  
from indirect observations . . . . . CRISTINA BUTUCEA 1907
- Estimation in spin glasses: A first step . . . . . SOURAV CHATTERJEE 1931
- Estimation of the Hurst parameter from discrete noisy data  
ARNAUD GLOTER AND MARC HOFFMANN 1947
- Transform martingale estimating functions . . . . . T. MERKOURIS 1975
- Asymptotic theory of least squares estimators for nearly unstable processes under strong  
dependence . . . . . BORIS BUCHMANN AND NGAI HANG CHAN 2001
- Goodness-of-fit tests via phi-divergences . . . . . LEAH JAGER AND JON A. WELLNER 2018
- Higher-order asymptotic normality of approximations to the modified signed likelihood  
ratio statistic for regular models . . . . . HEPING HE AND THOMAS A. SEVERINI 2054
- Asymptotically optimal multistage tests of simple hypotheses . . . . . JAY BARTROFF 2075
- Two likelihood-based semiparametric estimation methods for panel count data with  
covariates . . . . . JON A. WELLNER AND YING ZHANG 2106
- On surrogate dimension reduction for measurement  
error regression: An invariance law . . . . . BING LI AND XIANGRONG YIN 2143
- On the “degrees of freedom”  
of the lasso . . . . . HUI ZOU, TREVOR HASTIE AND ROBERT TIBSHIRANI 2173
- Optimal third root asymptotic bounds in the statistical estimation of thresholds  
FRANZ MERKL AND LEILA MOHAMMADI 2193
- Variance estimation in nonparametric regression via the difference  
sequence method . . . . . LAWRENCE D. BROWN AND M. LEVINE 2219
- Iterative estimating equations: Linear convergence and asymptotic properties  
JIMING JIANG, YIHUI LUAN AND YOU-GAN WANG 2233
- On optimality of Bayesian testimation in the normal means problem  
FELIX ABRAMOVICH, VADIM GRINSHTEIN AND MARIANNA PENSKY 2261
- Spatial aggregation of local likelihood estimates with applications to classification  
DENIS BELOMESTNY AND VLADIMIR SPOKOINY 2287
