

THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Common functional principal components MICHAL BENKO, WOLFGANG HÄRDLE AND ALOIS KNEIP	1
Smoothing splines estimators for functional linear regression CHRISTOPHE CRAMBES, ALOIS KNEIP AND PASCAL SARDA	35
Functional deconvolution in a periodic setting: Uniform case MARIANNA PENSKY AND THEOFANIS SAPATINAS	73
Quantile pyramids for Bayesian nonparametrics NILS LID HJORT AND STEPHEN G. WALKER	105
Minimum distance regression model checking with Berkson measurement errors HIRA L. KOUL AND WEIXING SONG	132
Consistencies and rates of convergence of jump-penalized least squares estimators LEIF BOYSEN, ANGELA KEMPE, VOLKMAR LIEBSCHER, AXEL MUNK AND OLAF WITTICH	157
Testing for jumps in a discretely observed process YACINE AÏT-SAHALIA AND JEAN JACOD	184
Monte Carlo maximum likelihood estimation for discretely observed diffusion processes ALEXANDROS BESKOS, OMIROS PAPASPILIOPOULOS AND GARETH ROBERTS	223
Lasso-type recovery of sparse representations for high-dimensional data NICOLAI MEINSHAUSEN AND BIN YU	246
Inference for the limiting cluster size distribution of extreme values CHRISTIAN Y. ROBERT	271
Propagation of outliers in multivariate data FATEMAH ALQALLAF, STEFAN VAN AELST, VICTOR J. YOHAI AND RUBEN H. ZAMAR	311
Robustness of multiple testing procedures against dependence SANDY CLARKE AND PETER HALL	332
A note on the stationary bootstrap's variance DANIEL J. NORDMAN	359
A pseudo empirical likelihood approach for stratified samples with nonresponse FANG FANG, QUAN HONG AND JUN SHAO	371
Proportional hazards models with continuous marks YANQING SUN, PETER B. GILBERT AND IAN W. MCKEAGUE	394
Statistical inference for semiparametric varying-coefficient partially linear models with error-prone linear covariates YONG ZHOU AND HUA LIANG	427
Asymptotic inference for semiparametric association models GERHARD OSIUS	459
Empirical likelihood for estimating equations with missing values DONG WANG AND SONG XI CHEN	490
Support points of locally optimal designs for nonlinear models with two parameters MIN YANG AND JOHN STUFKEN	518
A universal procedure for aggregating estimators ALEXANDER GOLDENSHLUGER	542
