The Best in Mathematics

Granville's Calculus.

Distinctly *modern* and *teachable*: Contains an unusually large number of carefully graded examples, and the most complete list of integrals found in any elementary text-book in the English tongue.

Hawkes' Advanced Algebra.

Develops mathematical power: Presents a thorough treatment of the subjects of the examinations in algebra set by the most exacting colleges and scientific schools.

Smith and Gale's Elements of Analytic Geometry.

A book for beginners, adapted to the needs of colleges, schools of technology, and preparatory schools. The method is analytic rather than geometric; the results are stated in the form of theorems or rules; many illustrative examples are worked out.

Smith and Gale's Introduction to Analytic Geometry.

A short but thorough course in analytic geometry, based upon the first nine chapters of Smith and Gale's "Elements" described above.

Slocum and Hancock's Strength of Materials.

Thoroughly representative of the best modern theory and practice, and at the same time sufficiently elementary for the use of juniors in technical and engineering schools.

GINN & COMPANY, 29 Beacon St., Boston

Whole No. 171

CONTENTS

	PAGE
Construction of Plane Curves of Given Order and Genus, Having Distinct Double Points. By Professor VIRGIL SNYDER	1
On Periodic Linear Substitutions Whose Coefficients are Integers. By DR. ARTHUR RANUM	4
Even Multiply Perfect Numbers of Five Different Prime Factors. By Professor R. D. CARMICHAEL	7
The Fourth International Congress of Mathematicians: Sectional Meetings. By DR. C. L. E. MOORE	8
Notes	43
New Publications	51

Changes of address of members, exchanges, and subscribers should be communicated at once to the Secretary of the American Mathematical Society, 501 West 116th Street, New York.

Subscriptions to the BULLETIN, orders for back numbers, and inquiries in regard to non-delivery of current numbers should be addressed to The Macmillan Company, 41 North Queen St., Lancaster, Pa., or 66 Fifth Avenue, New York.

The initiation fees and annual dues of members of the American Mathematical Society are payable to the Treasurer of the American Mathematical Society, Professor J. H. Tanner, Cornell Heights, Ithaca, N. Y.

Articles for insertion in the BULLETIN should be addressed to the

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY,

501 West 116th Street, New York City.

The following dates have been fixed for the meetings of the Society:

	A. M.		A. M.
Sat., Oct. 31,	1908, 11:00	Sat., Feb. 27, 1909,	11:00
Tu.–W., Dec. 29–30,	" "	Sat., Apr. 24,	" "

THE NEW ERA PRINT, LANCASTER, PA.
