MANSFIELD MERRIMAN and ROBERT S. WOODWARD

No. 15

Mortality Laws and Statistics.

By Robert Henderson,

Actuary of the Equitable Life Assurance Society

This book sets forth in concise form the essential facts and theoretical relations with reference to the duration of human life.

A description is first given of the more important mortality tables. Then chapters are devoted to the mathematical functions connected with human mortality, to the analysis of probabilities of death or survival, and to the general mathematical laws which express the facts of human mortality.

vii + 111 pages, 6x9. Cloth, \$1.25 net.
