WILEY BOOKS

Just Published

Mathematical Theory of Finance

By **Thomas Milton Putnam, Ph.D.**,

Professor of Mathematics and Dean of the Undergraduate Division, University of California.

This book is intended for use in colleges whose crowded curricula will not permit the use of any of the several excellent books on the subject, which are too long and cover too much ground for the time at the instructor's disposal.

The fundamental principles of compound interest and annuities are thoroughly explained, and an introduction to the principles of life insurance is given.

About 250 problems are included, with several useful interest and annuity tables, for purposes of computation.

117 pages. $5\frac{1}{4}$ by 8. 3 figures. Cloth, \$1.75 postpaid.

Books by Ralph G. Hudson, S.B.

Assisted by **Joseph Lipka, Ph.D.**, **Dean Peabody, Jr., S.B.**, and **Howard B. Luther, S.B.**, Dipl. Ing.

The Engineer's Manual

This well-known reference book contains every important formula in Mathematics, Mechanics, Hydraulics, Heat and Electricity. It is used extensively by college students throughout this country.

315 pages. 5 by $7\frac{3}{4}$. 227 figures. Flexible binding, \$2.75 postpaid.

The Mathematical Sections of 'The Engineer's Manual' are also Published Separately, as follows:

A Manual of Mathematics

A collection of mathematical formulas and tables has been compiled for classroom use and for general reference.

130 pages. 5 by $7\frac{3}{4}$. 95 figures. Flexible binding, \$1.50 postpaid.

A Table of Integrals

Contains a table of derivatives, integrals, natural logarithms, and trigonometric and hyperbolic functions.

24 pages. 5 by $7\frac{3}{4}$. Paper cover, 15 cents postpaid.

Send for these, or any other Wiley books, on Free Examination terms.
