Creating new systems of automatic programming

One of the most challenging facets of programming is the creation and implementation of automatic programming systems.

Substantial progress has been made over the past three years. As in any pioneering effort, however, new problems constantly arise. Here are a few of the frontier areas of programming you might work in at IBM:

New logical scanning techniques for programming languages . . .

New, more powerful languages for the statement of problems . . .

Processors to translate programming languages into efficient machine language programs . . .

Advanced languages powerful enough to describe their own processors . . .

Programming concepts affecting logical machine design . . .

The general solution of these problems will lead to techniques applicable to many families of computers. If you are a qualified programmer or mathematician and are interested in joining professional people working in a professional atmosphere, with ample computer time to test your ideas, write to:

Manager of Technical Employment

IBM[®]

While in New York for the American Mathematical Society meeting, you are invited to visit with IBM, or call PLaza 3-0495 for an appointment to discuss career opportunities.

M A T H E M A T I C I A N S

With an interest in theoretical and applied statistics are invited to join an expanding scientific community

MITRE, a system engineering and development organization formed under the sponsorship of the Massachusetts Institute of Technology, has the unusual responsibility for providing engineering solutions to the varied and complex problems inherent in large-scale computer-based man-machine systems.

Within a complete system context, MITRE's tasks involve the establishment of system objectives, the development of design specifications, prototype equipment engineering of components as well as of major subsystems, analysis of subsystem interactions and evaluation of the operational system.

Mathematicians with a wide range of interests in statistical methods and techniques and an appreciation of the complexities of system work will find an excellent cross-disciplined environment in which to apply their professional backgrounds in such diversified areas as:

- Operations Research
- Information Theory
- Psychometrics
- Numerical Analysis
- Monte Carlo Methods
- Econometrics
- Real Time Simulations
- Game Theory
- Probability Studies

NEW YORK INTERVIEWS DURING IRE CONVENTION MARCH 21-22-23-24

Senior members of the Technical Staff will be available for interviews at the MITRE suite in the Waldorf Astoria Hotel.

If you prefer to arrange an appointment in advance, you are invited to CALL COLLECT,

Frank Balanis, Lexington, Massachusetts • VOlunteer 2-8950

To arrange an immediate confidential interview, please forward your resume to Dana N. Burdette, Personnel Director, Dept. 3-BE

THE MITRE CORPORATION

244 Wood Street - Lexington 73, Massachusetts

A brochure more fully describing MITRE and its activities is available on request.

Mathematics Section Head

*Outstanding Opportunity for
Capable Young Man to Move
Up to a Top Position in
Communications Research*

RESPONSIBILITIES

Will supervise and give technical direction to the activities of a group of mathematicians, physicists, and engineers in research and support activities in the general area of mathematical analysis. Must be capable of directing analysis and evaluation of communications systems, basic and applied research in mathematical areas related to communications, and analytical and theoretical design support activities of a Communications Department. Will also supervise the preparation of technical proposals and customer briefings for obtaining contract support in the subject area.

EDUCATIONAL REQUIREMENTS

PhD in Mathematics, or PhD in EE with Information Theory major desirable. MS in Math, Physics, or EE considered if accompanied by relevant experience.

EXPERIENCE

3 to 4 years experience in communications area desirable. Acquaintance with computers and computing techniques desirable but not necessary.

Please write in confidence to Dr. R. L. San Soucie

Boundary Problems in Differential Equations

edited by

Rudolph E. Langer

BOUNDARY PROBLEMS IN DIFFERENTIAL EQUATIONS is comprised of the nineteen papers which were delivered at The Symposium on Boundary Problems in Differential Equations conducted by the Mathematics Research Center, United States Army, at the University of Wisconsin, Madison, April 20-22, 1959. \$4.00

On Numerical Approximation

edited by

Rudolph E. Langer

ON NUMERICAL APPROXIMATION is comprised of the twenty-one papers which were delivered at The Symposium on Numerical Approximation conducted by the Mathematics Research Center, United States Army, at the University of Wisconsin in April, 1958. The objective of this symposium was the presentation and discussion of recent developments in the field of numerical approximation. The papers are centered around three general themes: *Linear Approximation*, *Extremal Approximation*, and *Algorithms*. \$4.50

New Books in the UNIVERSITY SERIES IN UNDERGRADUATE MATHEMATICS

NAIVE SET THEORY

by PAUL R. HALMOS, *University of
Chicago*

This brief, informal exposition
of set theory is written from the
viewpoint of a prospective mathe-
matician whose main interest is not
in the foundations of mathematics
but in such concrete mathematical
objects as groups, integrals, and
manifolds. With a minimum of
philosophical discourse and logical
formalism, Professor Halmos tells
the beginning graduate student
what he considers "the basic set-
theoretic facts of life." 110 pages,
April 1960, about \$3.50

AXIOMATIC SET THEORY

by PATRICK SUPPES, *Stanford Uni-
versity*

This new text approaches set
theory in a careful way from the
axiomatic standpoint. No mathe-
matical prerequisites are assumed,
although students without some
background in logic or mathe-
matics may find the treatment dif-
ficult. Professor Suppes clearly de-
velops the Zermelo-Fraenkel system
of set theory at a level suitable to
advanced undergraduate or begin-
ning graduate courses. 260 pages,
March 1960, about \$6.00

VAN NOSTRAND
Princeton, N. J.

Volume 9**

ORBIT THEORY

*These proceedings of a symposia held in April, 1957, in New York
contain the following papers:*

Orbit Stability in Particle Accelerators	E. D. Courant
Motion of Cosmic-Ray Particles in Galactic Magnetic Fields	Stanislaw Olbert
Störmer Orbits	W. H. Bennett
General Theory of Oblateness Perturbations	Paul Herget
Fundamental Problems in Predicting Positions of Artificial Satellites	F. L. Whipple
Cislunar Orbits	K. A. Ehricke
Satellite Launching Vehicle Trajectories	J. W. Siry
Numerical Determination of Precise Orbits	W. J. Eckert
Comments on General Theories of Planetary Orbits	Dirk Brouwer
Orbits in Birkoff's Central Field	Carlos Graef-Fernandez

195 pages 25% discount to members \$7.20

AMERICAN MATHEMATICAL SOCIETY
190 Hope Street, Providence, Rhode Island

A new series of books

Proceedings of Symposia in Pure Mathematics

Volume 1

FINITE GROUPS

The eleven articles in this book are texts of addresses which were delivered at a symposium held in April, 1959. The discussions at the symposium were lively and served to indicate an enormous renewed interest in one of the oldest branches of algebra. The major new results in the field which are brought out in this book should serve to stimulate research activity in the Theory of Groups, one of the most beautiful subjects of mathematics.

The authors contributing papers to this book are:

J. G. THOMPSON	WALTER FEIT	MICHIO SUZUKI
R. C. LYNDON	MARSHALL HALL, JR.	W. E. DESKINS
DANIEL GORENSTEIN	DANIEL HUGHES	HANS ZASSENHAUS
H. S. M. COXETER		WILHELM MAGNUS

120 pages 25% discount to members \$3.90

CONTEMPORARY PSYCHOLOGY

A Journal of
Reviews
Criticism
Opinion

No time to read?

Let *CP* help with . . .

Selective reviews of the latest books by specialists in the particular field involved.

Comment by the Editor on news from the publishing world, on the printed word in particular and in general, on criticism, reviewing, and opinion.

Feedback on controversial book reviews in a Letters-to-the-Editor section.

Reviews of films and other instructional media.

Lists of the latest books received.

Put *CP* in your brief case and read it on planes, trains, buses.

Keep in touch with the latest developments in your field of interest.

Subscription, \$8.00
(Foreign, \$8.50)

Single copy,
\$1.00

APPLIED MATHEMATICS

choice positions offering:

PROFESSIONAL ATMOSPHERE The Missile and Space Vehicle Department of General Electric is a progressive and dynamic organization involved in a variety of space programs. Currently under construction is a \$14,000,000 space research center in suburban Valley Forge which will become the headquarters for the Department upon completion in the Summer of 1961. This facility will provide the ultimate in technical facilities and is located in one of the nation's finest residential areas.

CHALLENGING TECHNICAL WORK Assignments on space vehicle and satellite programs covering such areas as trajectory studies, space navigation, analysis of flight telemetry data and space communications.

RECOGNITION The applied mathematics group provides consulting services to our entire engineering staff. Salary and professional growth are given corresponding emphasis.

Desirable experience and background would include strong analytical ability, extensive knowledge of advanced techniques in numerical analysis for computers and experience in mathematical investigations on advanced engineering programs. MS or PhD in Mathematics or Theoretical Physics required.

We invite you to send a brief resume of your background to: D. G. Curley, Div. 759

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to WALTER RUDIN, Department of Mathematics, University of Wisconsin, Madison, Wisconsin; Book Reviews to J. C. OXTOBY, Bryn Mawr College, Bryn Mawr, Pennsylvania. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. E. MOISE, Department of Mathematics, University of Michigan, Ann Arbor, Michigan. All other communications to the editors should be sent to the Managing Editor, E. E. MOISE.

The members of the Council for 1960 are: E. F. Beckenbach, E. G. Begle, Lipman Bers, R. H. Bing, R. P. Boas, Salomon Bochner, H. F. Bohnenblust, R. H. Bruck, R. C. Buck, M. M. Day, J. A. Dieudonné, J. L. Doob, Arthur Erdelyi, G. E. Forsythe, P. R. Garabedian, A. M. Gleason, J. W. Green, P. R. Halmos, Edwin Hewitt, G. P. Hochschild, G. B. Huff, Nathan Jacobson, Irving Kaplansky, L. H. Loomis, E. J. McShane, W. S. Massey, A. E. Meder, Jr., E. E. Moise, Deane Montgomery, J. C. Oxtoby, R. S. Pierce, Everett Pitcher, G. de B. Robinson, Alex Rosenberg, P. C. Rosenbloom, Walter Rudin, Hans Samelson, I. J. Schoenberg, I. E. Segal, I. M. Singer, E. H. Spanier, A. W. Tucker, S. M. Ulam, J. V. Wehausen, J. W. T. Youngs, Oscar Zariski, Leo Zippin.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is \$11.00 per annual volume of six numbers.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Lunt Building, Northwestern University, Evanston, Illinois; in probability, real variables, logic and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. HALMOS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1960. The subscription price is \$8.00 per volume.

Papers in analysis, applied mathematics and probability should be sent to LIPMAN BERS, Institute of Mathematical Sciences, New York University, New York, New York; in topology to W. S. MASSEY, Department of Mathematics, Brown University, Rhode Island; in algebra, number theory, and logic to G. P. HOCHSCHILD, Department of Mathematics, University of California, Berkeley 4, California; in geometry and abstract analysis to I. M. SINGER, Institute of Mathematical Sciences, New York University, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, LIPMAN BERS.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is \$50.00 per annual volume of eleven numbers.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is \$7.00 per annual volume of 7 numbers. A single copy is \$2.00.

All communications should be addressed to the Editor, G. L. WALKER, 190 Hope Street, Providence 6, R. I. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts of the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the inside front cover page.
