

CORRECTION TO "A COMPLEX OF PROBLEMS PROPOSED BY POST"

BY WILSON E. SINGLETARY

Communicated by L. Henkin, June 30, 1964

On p. 106 of the paper [1], change the requirement that *no* G_i or \bar{G}_i is the empty word to *no* G_i or \bar{G}_i contains less than two letters.

Replace Axioms 3, 4 and 7 of \mathfrak{P}_σ , respectively, by the following wffs.

- 3.' $[[p_1 \& p_3] \supset [q_1 \& q_2]] \supset \blacksquare [r_1 \& [p_1 \& p_3]] \supset [r_1 \& [q_1 \& q_2]],$
- 4.' $[[p_1 \& p_3] \supset [q_1 \& q_2]] \supset \blacksquare [[p_1 \& p_3] \& r_1] \supset [[q_1 \& q_2] \& r_1],$
- 7.' $[[p_1 \& p_3] \supset [q_1 \& q_2]] \supset \blacksquare [[q_1 \& q_2] \supset [r_1 \& r_2]] \supset [[p_1 \& p_3] \supset [r_1 \& r_2]].$

Theorems 1 and 3 may be proved as outlined in the paper using the original axiom set and without the change in the restriction on the G_i and \bar{G}_i given above. It is an open question, however, as to whether or not the proofs of the remaining theorems could be carried out without these changes.
