

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, School of Mathematics, Institute for Advanced Study, Princeton, New Jersey 08540; Book Reviews to FELIX BROWDER, Department of Mathematics, University of Chicago, Chicago, Illinois 60637. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720. All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER.

The members of the Council for 1967 are: A. A. Albert, R. D. Anderson, H. A. Antosiewicz, R. F. Arens, Maurice Auslander, P. T. Bateman, R. H. Bing, Felix Browder, William Browder, David Buchsbaum, R. C. Buck, A. P. Calderon, Lamberto Cesari, P. J. Cohen, P. E. Conner, C. W. Curtis, J. B. Diaz, Eldon Dyer, Samuel Eilenberg, Herbert Federer, Walter Feit, Murray Gerstenhaber, J. W. Green, P. R. Halmos, O. G. Harrold, S. Helgason, Henry Helson, M. H. Heins, Kenneth Hoffman, Eugene Isaacson, Norman Levinson, G. W. Mackey, Saunders Mac Lane, W. T. Martin, A. P. Mattuck, H. P. McKean, Jr., C. B. Morrey, J. K. Moser, G. D. Mostow, Louis Nirenberg, Ivan Niven, R. S. Palais, Frank Peterson, R. S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Dana Scott, George Seligman, Stephen Smale, N. E. Steenrod, Michio Suzuki, J. D. Swift, W. R. Wasow, Bertram Yood, John Werner.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or WOLFGANG WASOW, Van Vleck Hall, University of Wisconsin, Madison, Wisconsin 53706; in geometry and topology to ELDON DYER, The City University of New York, Graduate Studies Division, 33 West 42nd Street, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to MAURICE HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or WOLFGANG WASOW. All other communications to the editors should be addressed to the Managing Editor, MAURICE HEINS.

CONTENTS—*Continued from back cover*

T. A. Hannula, T. G. Ralley and I. Reiner. Modular representation algebras.	100
Bruce Rothschild. Degrees of irreducible modular characters of blocks with cyclic defect groups	102
J. Glimm and P. D. Lax. Decay of solutions of systems of hyperbolic conservation laws	105
E. J. Taft. Cohomology of algebraic groups and invariant splitting of algebras	106
Daniel Waterman. On the summability of the differentiated Fourier series.	109
T. G. McLaughlin. Hereditarily retraceable isols.	113
J. J. Uhl. Orlicz spaces of finitely additive set functions, linear operators, and martingales.	116
David G. Kendall. Delphic semigroups	120
William B. Arveson. An algebraic conjugacy invariant for measure-preserving transformations	121
Moss E. Sweedler. Cocommutative Hopf algebras with antipode	126
M. R. Leadbetter. A note on the moments of the number of axis-crossings by a stochastic process	129
L. R. Bragg. The radial heat equation with pole type data.	133
J. M. Boardman. On manifolds with involution	136
Vicki Chuckrow. Schottky groups and limits of Kleinian groups.	139
P. Porcelli and E. A. Pedersen. On rings of operators.	142
Marian Boykan Pour-El and Saul Kripke. Deduction-preserving “recursive isomorphisms” between theories.	145
Jack Bryant. On convolution and Fourier series.	149
J. C. Ferrar. On Lie algebras of type E_6	151
R. G. Douglas, H. S. Shapiro and A. L. Shields. On cyclic vectors of the backward shift	156
N. M. Stephens. Conjectures concerning elliptic curves	160
Samir A. Khabbaz and Everett Pitcher. Critical submanifolds of differentiable mappings	164
Gerald E. Sacks. Measure-theoretic uniformity	169
Albert Nijenhuis and R. W. Richardson, Jr. Deformations of homomorphisms of Lie groups and Lie algebras.	175
I. Stakgold. Bounds for linear functionals	180
M. A. Armstrong and E. C. Zeeman. Piecewise linear transversality.	184
Council and Board of Trustees—1966	189

CONTENTS

January, 1967

Invited Addresses

George Glauberman. Subgroups of finite groups	1
Robert D. M. Accola. Some classical theorems on open Riemann surfaces	13

Obituary

Richard Brauer. Emil Artin	27
--------------------------------------	----

Book Review

I. N. Herstein. Review of "Lectures in abstract algebra, Vol. III, Theory of fields and Galois theory," by Nathan Jacobson	44
--------------------------------------------------------------------------------------------------------------------------------------	----

The October Meeting in Philadelphia	47
-----------------------------------------------	----

The November Meeting in Tampa	48
-----------------------------------------	----

The November Meeting in La Jolla	49
--------------------------------------------	----

Report of the Treasurer, by W. T. Martin	50
----------------------------------------------------	----

Research Announcements

Jane M. O. Speakman. An algebraic characterisation of convergence ideals	53
------------------------------------------------------------------------------------	----

Wu-yi Hsiang. The natural metric on $SO(n)/SO(n-2)$ is the most symmetric metric	55
--------------------------------------------------------------------------------------------	----

Fred Galvin. Reduced products, Horn sentences, and decision problems	59
--------------------------------------------------------------------------------	----

Carl Faith. A general Wedderburn theorem	65
----------------------------------------------------	----

K. Chandrasekharan and Raghavan Narasimhan. On lattice-points in a random sphere	68
--------------------------------------------------------------------------------------------	----

J. B. Wagoner. Smooth and piecewise linear surgery	72
--------------------------------------------------------------	----

J. B. Wagoner. Producing PL homeomorphisms by surgery	78
-----------------------------------------------------------------	----

Peter Freyd. The Grothendieck group for stable homotopy is free	84
---------------------------------------------------------------------------	----

Zdeněk Frolík. Sums of ultrafilters	87
-----------------------------------------------	----

D. L. Stancl. Multiplication in Grothendieck rings of integral group rings	92
--------------------------------------------------------------------------------------	----

D. L. Hanson. A relation between moment generating functions and convergence rates in the law of large numbers	95
--------------------------------------------------------------------------------------------------------------------------	----

T. Crimmins and P. Rosenthal. On the decomposition of invariant subspaces	97
-------------------------------------------------------------------------------------	----
