

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, School of Mathematics, Institute for Advanced Study, Princeton, New Jersey 08540; Book Reviews to FELIX BROWDER, Department of Mathematics, University of Chicago, Chicago, Illinois 60637. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720. All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER.

The members of the Council for 1967 are: A. A. Albert, R. D. Anderson, H. A. Antosiewicz, R. F. Arens, Maurice Auslander, P. T. Bateman, R. H. Bing, Felix Browder, William Browder, David Buchsbaum, R. C. Buck, A. P. Calderon, Lamberto Cesari, P. J. Cohen, P. E. Conner, C. W. Curtis, J. B. Diaz, Eldon Dyer, Samuel Eilenberg, Herbert Federer, Walter Feit, Murray Gerstenhaber, J. W. Green, P. R. Halmos, O. G. Harrold, S. Helgason, Henry Helson, M. H. Heins, Kenneth Hoffman, Eugene Isaacson, Norman Levinson, G. W. Mackey, Saunders Mac Lane, W. T. Martin, A. P. Mattuck, H. P. McKean, Jr., C. B. Morrey, J. K. Moser, G. D. Mostow, Louis Nirenberg, Ivan Niven, R. S. Palais, Frank Peterson, R. S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Dana Scott, George Seligman, Stephen Smale, N. E. Steenrod, Michio Suzuki, J. D. Swift, W. R. Wasow, Bertram Yood, John Werner.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or WOLFGANG WASOW, Van Vleck Hall, University of Wisconsin, Madison, Wisconsin 53706; in geometry and topology to ELDON DYER, The City University of New York, Graduate Studies Division, 33 West 42nd Street, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to MAURICE HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or WOLFGANG WASOW. All other communications to the editors should be addressed to the Managing Editor, MAURICE HEINS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to LOUIS NIRENBERG, Courant Institute of Mathematical Sciences, New York University, New York, New York 10012; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

CONTENTS—*Continued from back cover*

W. Browder and G. R. Livesay. Fixed point free involutions on homotopy spheres.....	242
J. Kelleher and B. A. Taylor. An application of the Corona theorem to some rings of entire functions.....	246
Ottmar Loos. Reflexion spaces and homogeneous symmetric spaces.....	250
Erling Størmer. Two-sided ideals in C^* -algebras.	254
Irving Kessler. Semi-idempotent measures on abelian groups.....	258
Wayne Richter. Constructive transfinite number classes....	261
Glen E. Bredon. Equivariant cohomology theories.....	266
Glen E. Bredon. Equivariant stable stems.....	269
