

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, School of Mathematics, Institute for Advanced Study, Princeton, New Jersey 08540.

Book Reviews should be sent to FELIX BROWDER, Department of Mathematics, University of Chicago, Chicago, Illinois 60637.

Research Announcements should be sent to some member of the Council of the Society, and communicated by him to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER, at the above address.

The members of the Council for 1967 are: A. A. Albert, R. D. Anderson, H. A. Antosiewicz, R. F. Arens, Maurice Auslander, P. T. Bateman, R. H. Bing, Felix Browder, William Browder, David Buchsbaum, R. C. Buck, A. P. Calderon, Lamberto Cesari, P. J. Cohen, P. E. Conner, C. W. Curtis, J. B. Diaz, Eldon Dyer, Samuel Eilenberg, Herbert Federer, Walter Feit, Murray Gerstenhaber, J. W. Green, P. R. Halmos, O. G. Harrold, S. Helgason, Henry Helson, M. H. Heins, Kenneth Hoffman, Eugene Isaacson, Norman Levinson, G. W. Mackey, Saunders Mac Lane, W. T. Martin, A. P. Mattuck, H. P. McKean, Jr., C. B. Morrey, J. K. Moser, G. D. Mostow, Louis Nirenberg, Ivan Niven, R. S. Palais, Frank Peterson, R. S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Dana Scott, George Seligman, Stephen Smale, N. E. Steenrod, Michio Suzuki, J. D. Swift, W. R. Wasow, Bertram Yood, John Werner.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or WOLFGANG WASOW, Van Vleck Hall, University of Wisconsin, Madison, Wisconsin 53706; in geometry and topology to ELDON DYER, The City University of New York, Graduate Studies Division, 33 West 42nd Street, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to MAURICE HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or WOLFGANG WASOW. All other communications to the editors should be addressed to the Managing Editor, MAURICE HEINS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to LOUIS NIRENBERG, Courant Institute of Mathematical Sciences, New York University, New York, New York 10012; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMI NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long. Issued bimonthly.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of MATHEMATICAL REVIEWS will be published in 1967, Volume 33, and Volume 34. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Chinese Mathematics—Acta

This is a cover-to-cover translation into English of Acta Mathematica Sinica, a bimonthly published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

CONTENTS—*Continued from back cover*

C. J. Earle and J. Eells. The diffeomorphism group of a compact Riemann surface.	557
Neil W. Rickert. The range of a measure.	560
H. G. Garnir, M. De Wilde and J. Schmets. Constructive proof of the existence of multiplicative functionals in commutative separable Banach algebras.	564
Martin Schechter. Essential spectra of elliptic partial differential equations.	567
Robert T. Powers. Representations of uniformly hyperfinite algebras and their associated von Neumann rings.	572
F. J. Almgren, Jr. Existence and regularity of solutions to elliptic calculus of variations problems among surfaces of varying topological type and singularity structure.	576
Walter Rudin. Zero-sets in polydiscs.	580
Zeev Nehari. Extremal problems for a class of functionals defined on convex sets.	584
Zdzisław Opial. Weak convergence of the sequence of successive approximations for nonexpansive mappings.	591
D. Sullivan. On the Hauptvermutung for manifolds.	598

CONTENTS

July, 1967

Book Review

Jacob Feldman. Review of "Mathematical foundations of quantum mechanics," by G. W. Mackey.....	499
The April Meeting in New York.....	501
The April Meeting in Chicago.....	508
The April Meeting in San Jose.....	509

Research Announcements

B. Schweizer and A. Sklar. The algebra of multiplace vector-valued functions.....	510
J. B. Diaz and F. T. Metcalf. On the structure of the set of subsequential limit points of successive approximations. . . .	516
Melvyn S. Berger. An application of the calculus of variations in the large to the equations of nonlinear elasticity.	520
J. Donald Monk. Nontrivial m -injective Boolean algebras do not exist.....	526
George B. Seligman. Some results on Lie p -algebras.	528
Richard B. Thompson. On the semicomplexes of F. Browder	531
B. E. Johnson. The uniqueness of the (complete) norm topology.	537
D. W. Dubois. Note on Artin's solution of Hilbert's 17th problem.....	540
David Williams. Local time at fictitious states.	542
Duane O'Neill. Duality and orientability in bordism theories	545
R. T. Moore. Duality methods and perturbation of semi-groups.....	548
Walter Koppelman. The Cauchy integral for differential forms.	554
