

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104.

Book Reviews should be sent to GIAN-CARLO ROTA, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139.

All Research Announcements should be sent to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, MURRAY GERSTENHABER, at the above address.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra, number theory, and algebraic geometry should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in modern or classical analysis to IRVING GLICKSBERG, Department of Mathematics, University of Washington, Seattle, Washington 98105 or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850; in set-theoretic and general topology to ERNEST A. MICHAEL, Department of Mathematics, University of Washington, Seattle, Washington 98105; in algebraic topology and all other geometry to P. EMERY THOMAS, Department of Mathematics, University of California, Berkeley, California 94720; in applied mathematics, differential equations, and related areas of analysis to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801. All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to J. J. KOHN, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

CONTENTS—Continued from back cover

William Jaco. Constructing 3-manifolds from group homomorphisms	936
K. G. Binmore and Melvin Katz. A note on the strong law of large numbers	941
Roger Wiegand. The cohomological dimension of stone spaces	944
N. M. Rivière. Vector valued multipliers and applications	946
P. Orlik and C. P. Rourke. Free involutions on homotopy $(4k+3)$ -spheres	949
Peter Crawley and Alfred W. Hales. The structure of torsion abelian groups given by presentations	954
Peter Hilton and Joseph Roitberg. Note on principal S^2 -bundles	957
Herbert S. Wilf. Hadamard determinants, Möbius functions, and the chromatic number of a graph	960
J. R. Hubbuck. Some results in the theory of H -spheres	965
L. G. Kovács, M. F. Newman and P. F. Pentony. Generating groups of nilpotent varieties	968
Julius L. Shaneson. Embeddings with codimension two of spheres in spheres and H -cobordisms of $S^1 \times S^3$	972
Karl Heinrich Hofmann and Paul S. Mostert. The cohomology of compact abelian groups	975
W. B. R. Lickorish and J. M. Martin. The impossibility of desuspending collapses	979
J. F. McClendon. A spectral sequence for classifying liftings in fiber spaces	982
J. Palis. On Morse-Smale diffeomorphisms	985
Mitsuyoshi Kato. Regular neighborhoods are not topologically invariant	988
Aaron Strauss and James A. Yorke. Perturbing asymptotically stable differential equations	992
L. J. Grimm and Klaus Schmitt. Boundary value problems for delay-differential equations	997
David G. Ebin. On the space of Riemannian metrics	1001
Peter A. Loeb and Bertram Walsh. An axiomatic approach to the boundary theories of Wiener and Royden	1004
C. A. Berger and L. A. Coburn. C^* -algebras of translations and multipliers	1008
Heydar Radjavi and Peter Rosenthal. Invariant subspaces and weakly closed algebras	1013
James E. West. Extending certain transformation group actions in separable, infinite-dimensional Frechet spaces and the Hilbert cube	1015
Arnold Lebow. Maximal ideals in tensor products of Banach algebras	1020
Richard Beals. On eigenvalue distributions for elliptic operators without smooth coefficients. II	1022
Michael O. Rabin. Decidability of second-order theories and automata on infinite trees	1025
Fred Gross. On the growth of $f(g)$	1030
Errata, Volume 74	1033

CONTENTS

September, 1968

Survey Article

- R. D. Anderson and R. H. Bing. A complete elementary proof that Hilbert space is homeomorphic to the countable infinite product of lines. 771

Gibbs Lecture

- Eugene P. Wigner. Symmetry principles in old and new physics. 793

Invited Addresses

- A. S. Householder. Norms and the localization of roots of matrices. 816
- Wolfgang Wasow. Connection problems for asymptotic series. 831
- Solomon Lefschetz. A page of mathematical autobiography. 854
- The April Meeting in Chicago. 880
- Report of the Treasurer, by W. T. Martin. 884

Research Announcements

- Herbert B. Keller. Nonexistence and uniqueness of positive solutions of nonlinear eigenvalue problems. 887
- R. C. Buck. Decidable semigroups. 892
- R. G. Douglas. Toeplitz and Wiener-Hopf operators in $H^\infty + C$ 895
- Richard Brauer. On simple groups of order $5 \cdot 3^a \cdot 2^b$ 900
- Richard K. Miller and George R. Sell. A note on Volterra integral equations and topological dynamics. 904
- James S. W. Wong. Second order linear oscillation with integrable coefficients. 909
- Andre de Korvin. Expectations in von Neumann algebras. 912
- J. L. Johnson and J. A. Smoller. Global solutions of hyperbolic systems of conservation laws in two dependent variables. 915
- J. Fogarty and D. S. Rim. Serre sequences and Chern classes. 919
- Stanley E. Payne. A Bruck-Ryser type nonexistence theorem. 922
- Thomas L. Sherman. On solutions of n th order linear differential equations with n zeros. 923
- Seth Warner. Two types of locally compact rings. 926
- Samuel S. Holland, Jr. On the adjoint of the product of operators. 931
- R. C. Lacher. Cell-like mappings of ANR's. 933
