THE JUNE MEETING IN BELLINGHAM

The seven hundred fifth meeting of the American Mathematical Society was held at Western Washington State College in Bellingham, Washington, on Saturday, June 16, 1973. The meeting was held in conjunction with the Northwest Sectional meetings of the Mathematical Association of America and the Society for Industrial and Applied Mathematics. There were 128 registrants at the meeting, including 91 members of the Society.

By invitation of the Committee to Select Hour Speakers for Far Western Sectional Meetings, there were two invited addresses. Professor Burton Rodin of the University of California, San Diego, lectured on *The method of extremal length*. He was introduced by Professor William L. Hart. Professor Haskell P. Rosenthal of the University of California, Berkeley, lectured on *The Banach spaces $C(K)$ and $L^p(\mu)$*; he was introduced by Professor Robert I. Jewett. On Friday evening Professor George Polya of Stanford University gave an inspiring talk entitled *Galileo: His life and contributions to the scientific method*.

There were two sessions of contributed ten-minute papers; they were chaired by Professors Gail H. Atneosen and Steven M. Simmons.
