

JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and has a department of research announcements. Invited addresses offered for publication should be sent to HANS F. WEINBERGER, Dept. of Mathematics, University of Minnesota, Minneapolis, MN 55455. Book reviews should be sent to PAUL R. HALMOS, Dept. of Mathematics, Indiana University, Bloomington, IN 47401. Research announcements are limited to 100 typed lines of 65 characters each. They are intended to communicate outstanding results that are to be reported in full elsewhere. Research announcements should be sent directly to a member of the Council of the American Mathematical Society who is also a member of an editorial committee of the Society. The names of these Council members are on the inside back cover. All other correspondence about research announcements should be sent to JOHN L. KELLEY, Dept. of Mathematics, University of California, Berkeley, CA 94720.

The first page of each article, including research announcements, that is submitted for publication should bear a *descriptive title* which should be short, but informative. Useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Before the first footnote, there should be the AMS (MOS) *subject classification numbers* representing the primary and secondary subjects of the article. If a list of *key words and phrases* describing the subject matter of the article is included, it will also be printed as a footnote on the first page. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to MATHEMATICAL REVIEWS, index to volume 39 (1970). See the June 1970 NOTICES for more details, as well as illustrative examples.

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. NONE. 90% of the papers currently being communicated by the editors will be published in 3–4 months.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Papers in algebraic and differential topology should be sent to GLEN E. BREDON, Dept. of Mathematics, Rutgers University, New Brunswick, NJ 08903; in combinatorics and discrete mathematics to JAY R. GOLDMAN, School of Mathematics, University of Minnesota, Minneapolis, MN 55455; in commutative algebra to ROBERT M. FOSSUM, Dept. of Mathematics, University of Illinois, Urbana, IL 61801; in complex variables and analytic number theory to LOUIS BRICKMAN, Dept. of Mathematics, State University of New York at Albany, Albany, NY 12203 or to PETER L. DUREN, Dept. of Mathematics, University of Michigan, Ann Arbor, MI 48104; in differential equations to RICHARD K. MILLER, Dept. of Mathematics, Iowa State University, Ames, IA 50010; in functional analysis and operator theory to CHANDLER DAVIS, Dept. of Mathematics, University of Toronto, Toronto, M5 SA1, Ontario, Canada or to RONALD G. DOUGLAS, Dept. of Mathematics, State University of New York at Stony Brook, Stony Brook, NY 11790 or to PETER A. FILLMORE, Dept. of Mathematics, Indiana University, Bloomington, IN 47401; in general algebra to BARBARA L. OSOFSKY, Dept. of Mathematics, Rutgers University, New Brunswick, NJ 08903; in general analysis to RICHARD R. GOLDBERG, Dept. of Mathematics, University of Iowa, Iowa City, IA 52240; in general topology to W. WISTAR COMFORT, Dept. of Mathematics, Wesleyan University, Middletown, CT 06457 or to THOMAS A. CHAPMAN, Dept. of Mathematics, University of Kentucky, Lexington, KY 40506; in geometry to JOSEPH A. WOLF, Dept. of Mathematics, University of California, Berkeley, CA 94720; in group theory to NORMAN BLACKBURN, Dept. of Mathematics, University of Illinois at Chicago Circle, Chicago, IL 60680; in logic and foundations to K. JON BARWISE, Dept. of Mathematics, University of Wisconsin, Madison, WI 53706; in probability and other fields to JAMES D. KUELBS, Dept. of Mathematics, University of Wisconsin, Madison, WI 53706; in real variables to RICHARD A. HUNT, Division of Mathematical Sciences, Purdue University, Lafayette, IN 47907. All other communications should be addressed to the Managing Editor W. WISTAR COMFORT at the above address.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, JAMES H. BRAMBLE, Center for Applied Mathematics, 275 Olin Hall, Cornell University, Ithaca, NY 14853.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Abstracts and reviews are grouped under subject headings.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Papers in real analysis (excluding harmonic analysis) and applied mathematics should be sent to FRANÇOIS TREVES, Dept. of Mathematics, Rutgers University, New Brunswick, NJ 08903; in harmonic and complex analysis to HUGO ROSSI, Dept. of Mathematics, University of Utah, Salt Lake City, UT 84112; in abstract analysis to ALEXANDRA BELLOW, Dept. of Mathematics, Northwestern University, Evanston, IL 60201; in algebra and number theory (excluding universal algebras) to STEPHEN S. SHATZ, Dept. of Mathematics, University of Pennsylvania Philadelphia, PA 19174; in logic, foundations, universal algebras and combinatorics to ALISTAIR H. LACHLAN, Dept. of Mathematics, Simon Fraser University, Burnaby 2, B.C., Canada; in topology to PHILIP T. CHURCH, Dept. of Mathematics, Syracuse University, Syracuse, NY 13210; in global analysis and differential geometry to VICTOR W. GUILLEMIN, c/o Mrs. M. McQuillin, Dept. of Mathematics, Harvard University, Cambridge, MA 02138; in probability and statistics to DANIEL W. STROOCK, Dept. of Mathematics, University of Colorado, Boulder, CO 80302. All other communications to the editors should be addressed to the Managing Editor, A. H. LACHLAN at the above address.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

Notices of the American Mathematical Society, published eight times a year, announces the programs of the meetings of the Society. The NOTICES carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists. All communications should be addressed to the Editor, American Mathematical Society, P.O. Box 6248, Providence, RI 02940. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced that issue. These deadlines are published regularly on the inside front cover.

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

CHAIRMEN OF PUBLICATION AND COMMUNICATION COMMITTEES

Bulletin Editorial Committee: John L. Kelley, Dept. of Mathematics, University of California, Berkeley, CA 94720

Proceedings Editorial Committee: W. Wistar Comfort, Dept. of Mathematics, Wesleyan University, Middletown, CT 06457

Transactions and Memoirs Editorial Committee: A. H. Lachlan, Dept. of Mathematics, Simon Fraser University, Burnaby (2), B.C., Canada.

Mathematical Reviews Editorial Committee: D. J. Lewis, Dept. of Mathematics, University of Michigan, Ann Arbor, MI 48104

Colloquium Editorial Committee: S. S. Chern, University of California, Berkeley, CA 94720

Mathematical Surveys Editorial Committee: Edgar H. Brown, Jr., Dept. of Mathematics, Brandeis University, Waltham, MA 02154

Mathematics of Computation Editorial Committee: James H. Bramble, Dept. of Applied Mathematics, 275 Olin Hall, Cornell University, Ithaca, NY 14853

Committee to Monitor Problems in Communication: Leonard Gillman, Dept. of Mathematics, University of Texas at Austin, Austin TX 78712

Representatives of the Society on the Board of Editors of the American Journal of Mathematics: Hyman Bass, Dept. of Mathematics, Columbia University, New York, NY 10027; I. M. Singer, Dept. of Mathematics, Massachusetts Institute of Technology, Cambridge, MA 02139

Executive Editor of Mathematical Reviews: Jacob Burlak, 611 Church Street, Ann Arbor, MI 48104

Editor of Translations Projects: Ben Silver, American Mathematical Society, P.O. Box 6248, Providence, RI 02940

Jean E. Taylor. The structure of singularities in area-related variational problems with constraints.....	1093
Dennis Sentilles. An L^1 -space for Boolean algebras and semireflexivity of $L^\infty(X, \Sigma, \mu)$	1096
J. A. Burns and T. L. Herdman. Adjoint semigroup theory for a Volterra integro-differential system.....	1099
David E. Radford. The antipode of a finite-dimensional Hopf algebra over a field has finite order.....	1103
Yoshiomi Nakagami. Duality for crossed products of von Neumann algebras by locally compact groups.....	1106
Leon Ehrenpreis. Hyperbolic equations and group representations.....	1109
R. C. Buck. Approximate functional complexity.....	1112
David Williams. The Q -matrix problem for Markov chains.....	1115
Lawrence G. Brown. Operator algebras and algebraic K -theory.....	1119
Daniel B. Shapiro. Quadratic forms and similarities.....	1122
V. Poénaru. Stability of equivariant smooth maps.....	1125
René Lozi. A computing method for bifurcation boughs of nonlinear eigenvalue problems.....	1127
Colston Chandler and A. G. Gibson. Invariance principle for modified wave operators.....	1130
Domingo Toledo and Yue Lin L. Tong. The holomorphic Lefschetz formula.....	1133
Jerome L. Paul. Addendum, The q -regularity of lattice point paths in R^n	1136
Bylaws of the American Mathematical Society.....	1137
Index, Volume 81.....	1153
Statement of ownership, management and circulation.....	1162

COUNCIL, 1975

PUBLICATIONS COMMITTEES*

Robert G. Bartle, Hyman Bass, Alexandra Bellow, James H. Bramble, Glen E. Bredon, Edgar H. Brown, Jr., Alberto P. Calderón, S. S. Chern, Philip T. Church, W. Wistar Comfort, Chandler Davis, Samuel Eilenberg, Robert M. Fossum, Walter Gautschi, Richard R. Goldberg, Paul R. Halmos, Alston S. Householder, John L. Kelley, Alistair H. Lachlan, D. J. Lewis, Richard K. Miller, Barbara L. Osofsky, Jacob T. Schwartz, Stephen S. Shatz, I. M. Singer, Daniel W. Stroock, François Trèves, Hans F. Weinberger, John W. Wrench, Jr.

OTHER MEMBERS OF THE COUNCIL

Paul Bateman, Anatole Beck, Lipman Bers, Raoul H. Bott, Charles W. Curtis, David Gale, Leonard Gillman, Michael Golomb, Walter Gottschalk, Mary W. Gray, Judy Green, Phillip A. Griffiths, Orville G. Harrold, Jr., Irving Kaplansky, Herbert B. Keller, Robion C. Kirby, Lee Lorch, Saunders Mac Lane, Arthur P. Mattuck, John W. Milnor, Cathleen S. Morawetz, Karl K. Norton, Franklin Peterson, Everett Pitcher, Murray H. Protter, Kenneth A. Ross, Jane Cronin Scanlon, J. Ernest Wilkins, Jr.

* Research announcements, limited to 100 typed lines of 65 spaces each, may be submitted to those members of the Council who are members of the publications committees. Such announcements are intended to communicate outstanding results that are to be reported in full elsewhere.

CONTENTS
November, 1975

H. M. Stark. The analytic theory of algebraic numbers.....	961
J. R. Shoenfield. The decision problem for recursively enumerable degrees.....	973
J. R. Retherford. Applications of Banach ideals of operators.....	978
Fritz John. A priori estimates, geometric effects and asymptotic behavior.....	1013
Juan Jorge Schäffer. Review of "Stability of solutions of differential equations in Banach space" by Ju. L. Daleckii and M. G. Krein.....	1024
J. William Helton. Review of "Indefinite inner product spaces" by János Bognár	1028
K. Jon Barwise. Review of "Elementary induction on abstract structures" by Yiannis Nicholas Moschovakis.....	1031
A. Erdélyi. Review of "Constructive methods for elliptic equations" by R. P. Gilbert.....	1036
Barbara L. Osofsky. Review of "The structure of fields" by David J. Winter.....	1037
Albert A. Mullin. Review of "General systems theory: Mathematical founda- tions" by M. D. Mesarovic and Y. Takahara.....	1042
George C. Papanicolaou. Review of "An introduction to invariant imbedding" by R. Bellman and G. M. Wing.....	1044
Joseph L. Taylor. Review of "Cohomology theories for compact abelian groups" by K. H. Hofmann and P. S. Mostert.....	1045
Elections to membership.....	1050
The March meeting in Mobile.....	1053
The March meeting in New York.....	1054
The April meeting in St. Louis.....	1055
The April meeting in Monterey.....	1060
The June meeting in Pullman.....	1060
L. Pukanszky. Lie groups with completely continuous representations.....	1061
Constantin Niculescu. Absolute continuity and weak compactness.....	1064
Michael Freedman. On the classification of taut submanifolds.....	1067
Tuong Ton-That. On holomorphic representations of symplectic groups.....	1069
Haynes R. Miller, Douglas C. Ravenel and W. Stephen Wilson. Novikov's Ext^2 and the nontriviality of the gamma family.....	1073
Paul C. Fife and J. B. McLeod. The approach of solutions of nonlinear diffusion equations to travelling wave solutions.....	1076
V. Poénaru. Some invariants of generic immersions and their geometric applica- tions.....	1079
A. T. Dash. Joint spectrum in the Calkin algebra.....	1083
Robert S. Cahn and Joseph A. Wolf. Zeta functions and their asymptotic expan- sions for compact locally symmetric spaces of negative curvature.....	1086
J. R. Holub. Rotundity, orthogonality, and characterizations of inner product spaces.....	1087
A. Connes. Classification of automorphisms of hyperfinite factors of type II_1 and II_∞ and application to type III factors.....	1090
