

JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

Mathematics of the USSR–Izvestiya, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA.

Mathematics of the USSR–Sbornik is a monthly journal and is a cover-to-cover translation of MATEMATICHESKIĬ SBORNIK (NOVAYA SERIYA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA.

Vestnik Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVERSITETA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of AKADEMIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTITUTA IMENI V. A. STEKLOVA.

RESEARCH JOURNALS

Submission information for these journals is included in the May and September issues of this *Bulletin*.

Bulletin (New Series) of the American Mathematical Society is a bimonthly journal which contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society "by title".

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and review of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Starting in 1979 the second volume index each year is the author and subject index for the entire year. Abstracts and reviews are grouped under subject headings.

Notices of the American Mathematical Society, published eight times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

BULLETIN (New Series) of the American Mathematical Society

EDITORS

EDITORIAL BOARD FOR RESEARCH-EXPOSITORY ARTICLES

Hyman Bass	Irving Kaplansky
Felix E. Browder	Peter D. Lax
Chairman	John W. Milnor
S. S. Chern	Hugh L. Montgomery
Fredrick W. Gehring	Gian-Carlo Rota

EDITORIAL BOARD FOR RESEARCH ANNOUNCEMENTS

Spencer Bloch	Richard Melrose
Charles L. Fefferman	Calvin C. Moore
Ronald L. Graham	Chairman
Melvin Hochster	Yiannis Moschovakis
Henry P. McKean, Jr.	Harold M. Stark

BOOK REVIEW EDITOR: Meyer Jerison

MANAGING EDITOR: Calvin C. Moore

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification can be found in the December index volumes of *Mathematical Reviews*.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing of the manuscript. The 1978 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of \$40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (For details write Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970.)

(Continued from back cover)

Lagrangian analysis and quantum mechanics, a mathematical structure related to asymptotic expansions and the Maslov index by <i>Jean Leray</i> ; Semi-classical approximation in quantum mechanics by <i>V. P. Maslov and M. V. Fedoriuk</i> —Reviewed by <i>Robert J. Blattner and James Ralston</i>	387
Optimization—Theory and applications, Problems with ordinary differential equations by <i>Lamberto Cesari</i> —Reviewed by <i>J. Warga</i>	396
Statistical analysis of counting processes by <i>Martin Jacobsen</i> —Reviewed by <i>David P. Harrington</i>	401
Nonlinear analysis on manifolds. Monge-Ampère equations by <i>Thierry Aubin</i> —Reviewed by <i>Jerry L. Kazdan</i>	407
Index	415

Research — Expository Papers

The influence of elasticity on analysis: Modern developments by *Stuart S. Antman* 267
The influence of elasticity on analysis: The classic heritage by *C. Truesdell* 293

Research Announcements

Asymptotic behaviour of Eisenstein integrals by *E. P. van den Ban* 311
The Newton diagram of an analytic morphism, and applications to differentiable functions by *Edward Bierstone and Pierre D. Milman*..... 315
Cascades of period-doubling bifurcations: A prerequisite for horseshoes by *James A. Yorke and Kathleen T. Alligood* 319
On the local Langlands conjecture in prime dimension by *Philip Kutzko and Allen Moy*..... 323
Invariants of formal group law actions by *Robert M. Fossum*..... 327
A nonstandard ideal of a radical Banach algebra of power series by *Marc P. Thomas* 331
Invariant theory of G_2 by *Gerald W. Schwarz* 335

Book Reviews

The core model by *A. J. Dodd*—Reviewed by *Akihiro Kanamori* 339
Topics in iteration theory by *György Targonski*—Reviewed by *Abe Sklar* 345
Birkhoff interpolation by *G. G. Lorentz, K. Jetter and S. D. Riemenschneider*—Reviewed by *Eli Passow* 348
The theory of Eisenstein systems by *M. Scott Osborne and Garth Warner*—Reviewed by *R. P. Langlands* 351
CR submanifolds of Kaehlerian and Sasakian manifolds by *Kentaro Yano and Masahiro Kon*—Reviewed by *Bang-yen Chen* 361
Basic theory of algebraic groups and Lie algebras by *Gerhard P. Hochschild*; **Linear algebraic groups** by *T. A. Springer*—Reviewed by *Brian Parshall*..... 364
Computational methods for fluid flow by *Roger Peyret and Thomas D. Taylor*—Reviewed by *Alexandre Joel Chorin* 368
Spectral theory and wave operators for the Schrödinger equation by *A. M. Berthier*—Reviewed by *Lawrence E. Thomas*..... 372
Hyperbolic boundary value problems by *Reiko Sakamoto*—Reviewed by *G. F. D. Duff*..... 375
Differential operators for partial differential equations and function theoretic applications by *K. W. Bauer and S. Ruscheweyh*—Reviewed by *Peter A. McCoy*..... 378
Finite groups and finite geometries by *T. Tsuzuku*—Reviewed by *William M. Kantor* 382
