

JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences in the USSR. DOKLADY publishes 500 articles a year, each about four pages long.

Mathematics of the USSR–Izvestiya, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA, published by the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Mathematics of the USSR–Sbornik is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKII SBORNIK (NOVAYA SERIYA), published by the Moscow Mathematical Society and the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA published by Kiev University, beginning with the 1970 Soviet publication.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA which contains the results of original research in pure mathematics.

Proceedings of the Steklov Institute of Mathematics is a translation of the AKADEMIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTITUTA IMENI V. A. STEKLOVA. Issues contain book-length articles or collections of articles pertaining to the same topic.

CONTENT AND SUBMISSION INFORMATION FOR RESEARCH JOURNALS

Bulletin (New Series) of the American Mathematical Society contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics. See inside front cover for submission information.

Journal of the American Mathematical Society is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, WALTER GAUTSCHI, Computer Sciences Department, Purdue University, West Lafayette, Indiana 47907.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

Logic and foundations (03 04) to ANDREAS R. BLASS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

Combinatorics, computer science, and information theory (05 15 68 94) to JEFFREY N. KAHN, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

Commutative algebra (06 12 13 14 15 18) to LOUIS J. RATLIFF, JR., Department of Mathematics, University of California, Riverside, California 92502

General algebra (16 17 18 08) to MAURICE AUSLANDER, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

Group theory (20) to WARREN J. WONG, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

Algebraic and differential topology (55 57 58) to FREDERICK R. COHEN, Department of Mathematics, University of Rochester, Rochester, New York 14627

Real variables (26 28 40) to ANDREW M. BRUCKNER, Department of Mathematics, University of California, Santa Barbara, California 93106

Complex variables (30 31 32) to CLIFFORD J. EARLE JR., Cornell University, White Hall, Ithaca, New York 14853

Number theory (11) to WILLIAM ADAMS, Department of Mathematics, University of Maryland, College Park, MD 20742

Ordinary differential equations and dynamical systems (33 34 39 49 58) to KENNETH R. MEYER, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

Partial differential equations (35 49) to BARBARA L. KEYFITZ, Department of Mathematics, University of Houston, Houston, Texas 77204-3476

General analysis (41 42 43 44 45) to J. MARSHALL ASH, Department of Mathematics, DePaul University, Chicago, Illinois 60614

Functional analysis and operator theory (46 47) to PALLE E. T. JORGENSEN, University of Iowa, Iowa City, Iowa 52242

Functional analysis and convexity (46 52) to WILLIAM J. DAVIS, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

Complex variables, functional analysis, and operator theory (30 46 47) to PAUL S. MUHLY, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

Lie groups and geometry (22 51 53) to JONATHAN M. ROSENBERG, Department of Mathematics, University of Maryland, College Park, Maryland 20742

General topology (54) to DENNIS BURKE, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056, or JAMES E. WEST, Department of Mathematics, Cornell University, Ithaca, New York 14853

Probability and certain other fields (60–94 inclusive) to LAWRENCE F. GRAY, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455, or GEORGE C. PAPANICOLAOU, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, WILLIAM J. DAVIS, at the above address.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Two copies of the manuscript should be submitted to one of the following editors.

Harmonic analysis, representation theory and Lie theory to AVNER D. ASH, Department of Pure Mathematics and Mathematical Statistics, University of Cambridge, 16 Mill Lane, Cambridge, CB2 1SB, England

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Classical analysis (including complex, real and harmonic) to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455

Algebra, algebraic geometry and number theory to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to BURGESS DAVIS, Departments of Mathematics and Statistics, Purdue University, West Lafayette, IN 47907.

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 37550

Automorphic and modular functions and forms, geometry of numbers, multiplicative theory of numbers, zeta and L -functions of number fields and algebras to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society "by title".

Current Mathematical Publications, issued triweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme (1985 Revision). The subscription includes an annual author and subject index.

Notices of the American Mathematical Society, published ten times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

MANUSCRIPT, PROOF, AND COPYING INFORMATION

MANUSCRIPT

Articles submitted for publication should be typewritten and double-spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand-drawn symbols are satisfactory if clearly done; special instructions for the typesetter, when necessary, should be included on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification (1985 Revision) can be found in the annual subject index volumes of *Mathematical Reviews*.

To encourage the submission of manuscripts in electronic form using \TeX and the $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

OFFPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the author upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, a copy is sent to each author. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

There are no page charges assessed on papers published in the BULLETIN.

REMARKS ON RESEARCH ANNOUNCEMENTS

The BULLETIN of the American Mathematical Society is the only research mathematical journal received as a privilege of membership in the Society. Its circulation is larger, by an order of magnitude, than that of most journals, in particular specialized journals. Thus, a BULLETIN Research Announcement should contain results of sufficient depth and import to be of interest to a wide mathematical audience. And, consequently, beyond basic mathematical standards, Research Announcements should meet high standards for style.

Beyond general exhortations to write clearly and precisely, the following more specific suggestions are offered.

1. Keep in mind that you are writing for as wide an audience as possible. Avoid the shorthand and jargon of your area as much as you can. Carefully introduce the terminology needed to understand the main results. If space considerations prevent a full development of the concepts, delineate clearly what you are not explaining and provide references to it in the literature. Consider an Announcement an opportunity to explain your area of research to the world at large.

2. Do not confuse a graceful style with a sloppy style. Although a light touch or a colorful phrase can relieve the tedium of definitions, excessive breeziness and imprecision confuse readers who have only a casual knowledge of the subject. We say this not to encourage pedantic writing but to discourage obscure writing. Your results should be stated precisely with all important concepts and notations made clear.

3. Ask a colleague to review your manuscript before you submit it. Even better, ask two colleagues, one whose work is very close to yours, one whose work is farther away. (If you can't get two people you know to read your work before it is published, how many will want to read it after?) Ask for suggestions on how to improve the readability.
