## BULLETIN (New Series) of the American Mathematical Society

BULLETIN (New Series) contains articles of the types listed below. Information on Manuscript, Proof, and Copying can be found at the back of this journal.

### RESEARCH-EXPOSITORY PAPERS

These are, by definition, papers which present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures and retiring presidential addresses will be included in this section. Manuscripts should be submitted to Professor Richard S. Palais, Department of Mathematics, Brandeis University, Waltham, MA 02154-9110.

### RESEARCH ANNOUNCEMENTS

The purpose of this department is to publish quickly and disseminate widely significant new mathematics. A Research Announcement should be designed to communicate its contents to a broad mathematical audience and should meet high standards for clarity as well as mathematical content. It should begin with an abstract containing a brief technical description of the new material. Then there should be an introductory section addressed to nonexperts describing the motivation, background, and significance of the results announced. Following the statement of results, there should follow a sketch of proofs which may be addressed to experts. Having colleagues, including nonexperts, proofread a manuscript can be an effective way to improve readability. An announcement should normally not exceed 8 journal pages, and preferably not exceed 6 pages. Authors should send five (5) copies of each manuscript to Professor Frank Quinn, Department of Mathematics, Virginia Polytechnic Institute and State University, Blacksburg, VA 24061-0123. Under ideal conditions, papers appear about 7 months after submission.
