INSTRUCTIONS TO AUTHORS

A. General

Manuscripts should be submitted in duplicate. They should preferably be written in English; papers in French or German are also accepted. Manuscripts must be in their final form, typed on one side of each sheet only, with double spacing and wide margins. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible.

Please include a "Note for the Printer" explaining markings used. See suggestion overleaf.

To speed up publication, authors will receive only one set of proofs: provisionally numbered page proofs. Authors are requested to correct typographical errors only; they will be charged for corrections involving changes, additions or deletions to the original manuscript.

Diagrams should be submitted on separate sheets, not included in the text. They should be drawn in Indian ink in clean uniform lines, the whole about twice the size of the finished illustration. Inscriptions should allow for the figure 1, for example, to be about 2 mm high in the final version (i.e. 4 mm for reduction $\times \frac{1}{2}$). The author should mark in the margin of the manuscript where diagrams may be inserted.

Footnotes, other than those which refer to the title heading, should be numbered consecutively and placed at the foot of the page to which they refer (not at the end of the article).

Please give on the first page of the manuscript a running head (condensed title), which should not exceed 70 letters including spaces.

References to the literature should be listed at the end of the manuscript. The following information should be provided for journal articles: names and initials of all authors, name of the journal, volume, first and last page numbers and year of publication. References to books should include name(s) of author(s), full title, edition, place of publication, publisher and year of publication.

Examples

B. Marking

1. Text

The words "Theorem", "Lemma", "Corollary", "Proposition" etc. are normally printed in **boldface**, followed by the formulation in italics (to be underlined in the manuscript).

The words "Proof", "Remark", "Definition", "Note" etc. are printed in *italics* with the formulation in ordinary typeface.

Words or sentences to be set in italics should be marked by single underlining.

2. Formulae

Letters in formulae are normally printed in italics, figures in ordinary typeface.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: $b^g$, $a^\Psi$. Spacing of indices and exponents must be specially indicated ($A_{a^m}$) otherwise they will be set ($A^m_a$).

Underlining for special alphabets and typefaces should be done according to the following code:

- **single underlining**: small letter
- **double underlining**: capital letter
- **brown**: boldface headings, boldface letters in formulae
- **yellow**: upright
- **red**: Greek
- **blue**: Gothic
- **green**: Script
- **violet**: the numeral 1, and zero (to distinguish them from the small letter l and the capital letter O)

The following are frequently confused:

- $u$, $U$, $u$
- $w$, $W$
- $z$, $Z$

Please take care to distinguish them in some way.

C. Examples

1. Special alphabets or typefaces

New Volumes

Ergebnisse der Mathematik

The typical Ergebnisbericht should present to people working in the field as well as to colleagues who are working in closely related areas, all the up-to-date facts in a small but well defined area of mathematics. The definitions are there, the logical interrelations among different approaches are clarified, principle results and their most striking corollaries are stated, but the proofs may be omitted. A short indication of the nature of the proof is often given and an outline of the proof may occur where the technical details are replaced by reference to the literature. Such a report, with usable up-to-date bibliography and detailed author and subject indexes can be an extremely valuable research instrument. With the encouragement and help from our editorial board, a substantial list of reports has already been published, some of them classic in their fields.
