Introducing the 1st multidisciplinary guide to review articles

INDEX TO SCIENTIFIC REVIEWS™

Now you can easily find review articles on any subject in science. Each year the Index to Scientific Reviews (ISR™) will index over 16,000 reviews selected from more than 2,700 of the world’s most important journals.

Broad Coverage
Over 100 disciplines in every area of science are covered:
- Agricultural, Biological & Environmental Sciences
- Engineering, Technology & Applied Sciences
- Medical & Life Sciences
- Physical & Chemical Sciences
- Social & Behavioral Sciences
So you won’t have to go through separate references to locate review articles for subjects in any of these areas. With one index—the ISR—you can cross disciplinary lines and retrieve these key articles no matter where they were published in the literature. The ISR will even cover the literature published in quarterly and annual “review” publications (e.g., Annual Review of Genetics).

Effectively Indexed
The Index to Scientific Reviews makes it easy to find the review articles you need. Search by authors, title words and phrases, and organizations. Or use the ISR’s citation index—it lets you start a search with previously published material relevant to a subject and find more recent articles through citation relationships.

Highly Current
The ISR indexes the review literature on a calendar year basis. A soft-bound semiannual issue (covering January to June) will be available each September, and a hard-bound annual cumulation will appear the following April. So you can find new articles while they’re still new.

What’s It To You?
The ISR is a quick and easy way to find: 1) summaries of knowledge in fields unfamiliar to you, 2) those key articles you need to start a really thorough literature search, 3) the most recent review articles on any subject in science.

For More Information . . .
The first ISR annual cumulation (covering the 1974 literature) will soon be out, so get the full story on the Index to Scientific Reviews now. Just fill in the coupon, and mail it today.

I’d like to know more about the Index to Scientific Reviews™. Please send full information for myself and my library.

Contents

J. S. Frederiksen  Sommerfeld-Watson Representation for Double-Spectral Functions. II. Crossing Symmetric Pion-Pion Scattering Amplitude without Regge Poles  1

J. Kunofsky  Holomorphic Versions of the Fabrey-Glimm Representations of the Canonical Commutation Relations  32

O. Stormark  A Local Edge of the Wedge Theorem  33
S. Sakai  On Commutative Normal *-Derivations  39

J. L. Challifour, S. P. Slinker  Euclidean Field Theory. I. The Moment Problem  41

R. B. Israel  Existence of Phase Transitions for Long-Range Interactions  59

L. Abellanas, L. M. Alonso  On the Gel’fand-Kirillov Conjecture  69

K. Baumann  On Local Field Products in Special Wightman Theories  73

A. Gheorghe, El. Mihul  On the Geometry of Lorentz Orbit Spaces  89
