INSTRUCTIONS TO AUTHORS

A. General

Manuscripts should be submitted in duplicate. They should preferably be written in English; papers in French or German are also accepted. Manuscripts must be in their final form, typed on one side of each sheet only, with double spacing and wide margins. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible. Please include a “Note for the Printer” explaining markings used. See suggestion overleaf.

To speed up publication, authors will receive only one set of proofs: provisionally numbered page proofs. Authors are requested to correct typographical errors only; they will be charged for corrections involving changes, additions or deletions to the original manuscript.

Diagrams should be submitted on separate sheets, not included in the text. They should be drawn in Indian ink in clean uniform lines, the whole about twice the size of the finished illustration. Inscriptions should allow for the figure 1, for example, to be about 2 mm high in the final version (i.e. 4 mm for reduction × \frac{1}{2}). The author should mark in the margin of the manuscript where diagrams may be inserted.

Footnotes, other than those which refer to the title heading, should be numbered consecutively and placed at the foot of the page to which they refer (not at the end of the article). Please give on the first page of the manuscript a running head (condensed title), which should not exceed 70 letters including spaces.

References to the literature should be listed at the end of the manuscript. The following information should be provided for journal articles: names and initials of all authors, name of the journal, volume, first and last page numbers and year of publication. References to books should include name(s) of author(s), full title, edition, place of publication, publisher and year of publication.

Examples

B. Marking

The words "Theorem", "Lemma", "Corollary", "Proposition" etc. are normally printed in boldface, followed by the formulation in italics (to be underlined in the manuscript).

The words "Proof", "Remark", "Definition", "Note" etc. are printed in italics with the formulation in ordinary typeface.

Words or sentences to be set in italics should be marked by single underlining.

2. Formulae

Letters in formulae are normally printed in italics, figures in ordinary typeface.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: \( b^\gamma \), \( a^\nu \). Spacing of indices and exponents must be specially indicated (\( A_{m^*}^n \)) otherwise they will be set (\( A^m_n \)).

Underlining for special alphabets and typefaces should be done according to the following code:

<table>
<thead>
<tr>
<th>Single Underlining</th>
<th>Double Underlining</th>
<th>Brown</th>
<th>Yellow</th>
<th>Red</th>
<th>Blue</th>
<th>Green</th>
<th>Violet</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small Letter</td>
<td>Capital Letter</td>
<td>Boldface Headings, Boldface Letters in Formulae</td>
<td>Upright</td>
<td>Greek</td>
<td>Gothic</td>
<td>Script</td>
<td>The Numeral 1, and Zero</td>
</tr>
</tbody>
</table>

(abbreviations e.g. Re, Im, log, sin, ord, id, lim, sup, etc.)

The following are frequently confused:

\( u, U; v, V; x, X; v, \nu, \nu; \Theta, \Theta, \Phi, \Phi; \psi, \Psi; \epsilon, \epsilon; \)

The symbol \( a \) and the indefinite article \( a \);

also the handwritten Roman letters:

\( c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V; w, W; z, Z; \)

Please take care to distinguish them in some way.

C. Examples

1. Special alphabets or typefaces

<table>
<thead>
<tr>
<th>Script</th>
<th>Sanserif</th>
<th>Gothic</th>
<th>Boldface</th>
<th>Special Roman</th>
<th>Greek</th>
</tr>
</thead>
<tbody>
<tr>
<td>( A, B, C, D, E, \ldots )</td>
<td>( a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z )</td>
<td>( A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z )</td>
<td>( a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z )</td>
<td>( A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z )</td>
<td>( A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, )</td>
</tr>
</tbody>
</table>

2. Notations

<table>
<thead>
<tr>
<th>Preferred Form</th>
<th>Preferred Form</th>
</tr>
</thead>
<tbody>
<tr>
<td>( f \rightarrow B )</td>
<td>( A \rightarrow B )</td>
</tr>
</tbody>
</table>

Introducing the 1st multidisciplinary guide to review articles

INDEX TO SCIENTIFIC REVIEWS™

Now you can easily find review articles on any subject in science. Each year the Index to Scientific Reviews (ISR™) will index over 16,000 reviews selected from more than 2,700 of the world’s most important journals.

Broad Coverage
Over 100 disciplines in every area of science are covered:
- Agricultural, Biological & Environmental Sciences
- Engineering, Technology & Applied Sciences
- Medical & Life Sciences
- Physical & Chemical Sciences
- Social & Behavioral Sciences

So you won’t have to go through separate references to locate review articles for subjects in any of these areas. With one index—the ISR—you can cross disciplinary lines and retrieve these key articles no matter where they were published in the literature. The ISR will even cover the literature published in quarterly and annual “review” publications (e.g., Annual Review of Genetics).

Effectively Indexed
The Index to Scientific Reviews makes it easy to find the review articles you need. Search by authors, title words and phrases, and organizations. Or use the ISR’s citation index—it lets you start a search with previously published material relevant to a subject and find more recent articles through citation relationships.

Highly Current
The ISR indexes the review literature on a calendar year basis. A soft-bound semiannual issue (covering January to June) will be available each September, and a hard-bound annual cumulation will appear the following April. So you can find new articles while they’re still new.

What’s It To You?
The ISR is a quick and easy way to find: 1) summaries of knowledge in fields unfamiliar to you, 2) those key articles you need to start a really thorough literature search, 3) the most recent review articles on any subject in science.

For More Information...
The first ISR annual cumulation (covering the 1974 literature) will soon be out, so get the full story on the Index to Scientific Reviews now. Just fill in the coupon, and mail it today.

I’d like to know more about the Index to Scientific Reviews™. Please send full information for myself and my library.
