Communications in Mathematical Physics

It is a fundamental condition that submitted manuscripts have not been, and will not simultaneously be submitted or published elsewhere. With the acceptance of a manuscript for publication, the publishers acquire full and exclusive copyright for all languages and countries. Unless special permission has been granted by the publishers, no photographic reproductions, microform or any other reproductions of a similar nature may be made of the journal, of individual contributions contained therein or of extracts therefrom.

100 offprints of each article will be supplied to the author free-of-charge and additional copies may be obtained at cost price if ordered before the issue goes to press.

Manuscripts may be sent to:

Prof. H. Araki, Research Institute for Mathematical Sciences, Kyoto University, Kyoto, Japan	*Mathematical methods (Functional analysis, operator algebra and group theory, with direct relevance to physics)*

In order to avoid delay in publication this journal appears in loose numbers which can be subsequently assembled in volumes.

Note to Authors

To simplify the printing of mathematical formulae, authors are asked to use the forms indicated in the following examples when preparing their manuscripts.

$7/8, (a+b)/c$	instead of	$\frac{7}{8}, \frac{a+b}{c}$
$\frac{(a/b)\,d}{(a/3)-(x/2)}$		$\frac{\frac{a}{b}d}{\frac{a}{3}-\frac{x}{2}}$
$\frac{\cos(1/x)}{(a+(b/x))^{1/2}}$ or $(a+(b/x))^{-\frac{1}{2}}\cos(1/x)$		$\frac{\cos\frac{1}{x}}{\sqrt{a+\frac{b}{x}}}$
$\exp(-(x^2+y^2)/a^2)$		$e^{-\frac{x^2+y^2}{a^2}}$

The use of such linearized forms can mean up to 50% saving of time to the compositor. Considering the danger of misinterpretation of formulae by a copyeditor or compositor, the publishers find it essential that this simplification in the use of such expressions should be adopted by the authors themselves who are in the best position to ensure that the meaning and intended emphasis within the formulae are preserved. Finally we ask authors to continue to follow the Instructions to Authors as usual.

We thank you for your cooperation.
