

S. Flügge: Practical Quantum Mechanics

Springer Study Edition

With 78 figures
XVI, 623 pages. 1974
Study edition of "Practical
Quantum Mechanics I
and II (Grundlehren der
mathematischen Wissen-
schaften, Vol. 177 and
Vol. 178)
Soft cover DM 36,—
US \$14.80

Contents: General Concepts. — One-Body Problems without Spin. — Particles with Spin. — Many-Body Problems. — Non-Stationary Problems. — The Relativistic Dirac Equation. — Radiation Theory. — Mathematical Appendix.

With this unabridged one-volume study edition, author and publisher want to make this classical compendium of quantitative methods in quantum mechanics more easily accessible to students. In addition to classical problems and problems of relativistic quantum mechanics, this volume contains methods of approximation problems in radiation theory and scattering theory.

Mit dieser preiswerten, in einem Band zusammengefaßten Studienausgabe der „Practical Quantum Mechanics I und II“ wollen Autor und Verlag dieses klassischen Übungsbuch, welches die wesentlichen Probleme und Rechenmethoden der Quantenmechanik an zahlreichen Beispielen und Aufgaben erläutert, Studenten zugänglich machen. Es handelt sich um eine ungekürzte Ausgabe des auch in der Sammlung „Grundlehren der mathematischen Wissenschaften“ als Band 177 und 178 lieferbaren Werkes. Behandelt werden neben den klassischen Problemen die relativistische Quantenmechanik, Approximationsmethoden Streutheorie, etc.

Contents

- M. B. Mensky Relativistic Quantum Theory without Quantized Fields. I. Particles in the Minkowski Space 97
- M. A. Abramowicz,
J. P. Lasota,
B. Muchotrzeb On Fitting Rotating Bodies to Exterior Gravitational Fields 109
- A. Kishimoto Some Remarks on Fröhlich's Condition in $P(\phi)_2$ Euclidean Field Theory 117
- K. S. Viswanathan Statistical Mechanics of a One-dimensional Lattice Gas with Exponential-polynomial Interactions 131
- K. R. Ito Remarks on the Relation between the Lee-Yang Circle Theorem and the Correlation Inequalities 143
- M. Duneau,
B. Souillard Cluster Properties of Lattice and Continuous Systems 155
- A. Kishimoto On Uniqueness of KMS States of One-dimensional Quantum Lattice System 167
- F. J. Dyson Fredholm Determinants and Inverse Scattering Problems 171
- A. H. Taub High Frequency Gravitational Radiation in Kerr-Schild Space-Times 185
