

INSTRUCTIONS TO AUTHORS

A. General

In upper right corner of title page **write by hand** "For CMP".

Manuscripts should be submitted in duplicate. They should preferably be written in English; papers in French or German are also accepted.

Manuscripts must be in their **final form**, typed on one side of each sheet only, with double spacing and wide margins. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible.

Please include a "Note for the Printer" explaining markings used. See suggestion overleaf.

To speed up publication, authors will receive **only one set of proofs**: provisionally numbered page proofs. Authors are requested to **correct typographical errors only**; they will be charged for corrections involving changes, additions or deletions to the original manuscript.

Diagrams should be submitted on separate sheets, not included in the text. They should be drawn in Indian ink in clean uniform lines, the whole about twice the size of the finished illustration. Inscriptions should allow for the figure 1, for example, to be about 2 mm high in the final version (i.e. 4 mm for reduction $\times \frac{1}{2}$). The author should mark in the margin of the manuscript where diagrams may be inserted.

Footnotes, other than those which refer to the title heading, should be numbered consecutively and placed at the foot of the page to which they refer (not at the end of the article).

Please give on the first page of the manuscript a **running head** (condensed title), which should not exceed 70 letters including spaces.

References to the literature should be listed at the end of the manuscript. The following information should be provided for **journal articles**: names and initials of all authors, name of the journal, volume, first and last page numbers and year of publication. References to **books** should include name(s) of author(s), full title, edition, place of publication, publisher and year of publication.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin, it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, for detailed information.

B. Marking

1. Text

The words “**Theorem**”, “**Lemma**”, “**Corollary**”, “**Proposition**” etc. are normally printed in **boldface**, followed by the formulation in italics (to be underlined in the manuscript).

The words “*Proof*”, “*Remark*”, “*Definition*”, “*Note*” etc. are printed in *italics* with the formulation in ordinary typeface.

Words or sentences to be set in italics should be marked by single underlining.

2. Formulae

Letters in formulae are normally printed in italics, figures in ordinary typeface.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: $b_{\hat{A}}$, $a^{\hat{V}}$. Spacing of indices and exponents must be specially indicated ($A_m^{n^n}$) otherwise they will be set (A_{mn}^{nm}).

Underlining for special alphabets and typefaces should be done according to the following code:

single underlining:	small letter
double underlining:	capital letter
brown:	boldface headings, boldface letters in formulae
yellow:	upright
	(abbreviations e.g. Re, Im, log, sin, ord, id, lim, sup, etc.)
red:	Greek
blue:	Gothic
green:	Script
violet:	the numeral 1, and zero (to distinguish them from the small letter <i>l</i> and the capital letter <i>O</i>)

The following are frequently confused:

\cup , \mathbf{U} , \bigcup , U ; \circ , o , O , 0 ; \times , x , κ ; \vee , v , v ; θ , Θ , ϕ , φ , Φ , \emptyset ; ψ , Ψ ; ε , ϵ ;

a' , a^1 ; the symbol *a* and the indefinite article *a*;

also the handwritten Roman letters:

c , C ; e , l ; I , J ; k , K ; o , O ; p , P ; s , S ; u , U ; v , V ; w , W ; x , X ; z , Z ;

Please take care to distinguish them in some way.

„Ein Lehrstück der Zeitgeschichte“ (Der Spiegel) jetzt in deutscher Übersetzung

Aus dem Englischen übersetzt von J. Zehnder

1979. Etwa 40 Abbildungen. Etwa 420 Seiten
DM 38,-; US \$ 20.90
ISBN 3-540-09177-7

Als "Courant" 1976 in englischer Sprache erschien, war die Resonanz vielfältig und durchweg positiv. Diese Übersetzung macht auch dem deutschsprachigen Leser ein Buch zugänglich, das mehr ist als nur die Biographie des deutsch-amerikanischen Mathematikers Richard Courant. Die Autorin hat aus Gesprächen mit Courant, aus seinen Briefen und aus vielen Interviews mit dessen Freunden und Kollegen ein komplexes Bild von Richard Courant und seiner Zeit entworfen. An den Stationen seines Lebens wird ein Teil Zeit- und Wissenschaftsgeschichte dieses Jahrhunderts lebendig, illustriert mit vielen, bisher kaum veröffentlichten Photographien.

„Das spannend geschriebene und reich illustrierte Buch spiegelt am Leben einer bedeutenden Persönlichkeit eine Periode der neueren Geschichte wider. Die Lektüre ist deshalb auch für den Nichtmathematiker von großem Interesse.“

Neue Zürcher Zeitung

„Die Forscher-Vita geriet zu einem Lehrstück der Zeitgeschichte.“
