TEX users do it with Springer macros

If you are used to preparing your manuscripts with plain-TEX, you may be interested to hear that we have created a macro package for the layout of the journals listed here.

Articles may now be submitted as plain-TEX files using our macros. They will be phototypeset directly from your TEX-file, thus cutting down proofreading and publishing times.

The macros plus AMS fonts are available on 3.5" DOS diskettes and are free of charge.
