Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders
All articles published in this journal are protected by copyright, wich covers the exclusive rights to reproduce and distribute the article (e. g , as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.
The use of general descriptive names, trade names, trademarks, etc., in this publikation, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations
While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein

Special regulations for photocopies in the USA:
Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U S Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc , 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0010-3616, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, worldwide document delivery service for all Springer-Verlag journals For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel : 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca)

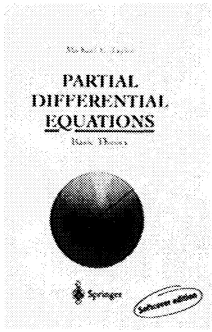
Partial Differential Equations

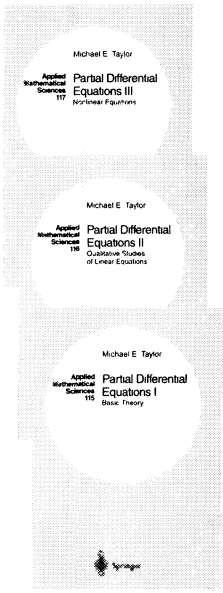
The introductory textbook

This text introduces of basic examples of partial differential equations, arising in continuum mechanics, electromagnetism, complex analysis and other areas, and develops a number of tools for their solution, including particularly Fourier analysis, distribution theory, and Sobolev spaces. These tools are applied to the treatment of basic problems in linear PDE including the Laplace equation, heat equation, and wave equation, as well as more general elliptic, parabolic, and hyperbolic equations. This book is also available in Hardcover as Volume 1 in the 3 volume set (below).



1996 Approx 585 pages
37 figures (Texts in Applied Mathematics, Vol. 23). Softcover DM 58,–
ISBN 0-387-94654-3

...and the comprehensive overview



M. Taylor

Partial Differential Equations

I: Basic Theory

1996. Approx. 586 pages. 37 figures (Applied Mathematical Sciences, Vol. 115). Hardcover DM 98,– ISBN 0-387-94653-5

Contents: 1) Basic theory of ODE and vector fields; 2) The Laplace equation and wave equation; 3) Fourier analysis, distributions, and constant coeffecient linear PDE; 4) Sobolev spaces; 5) Linear elliptic equations; 6) Linear evolution equations; Appendix A: Outline of functional analysis; Appendix B: Manifolds, vector bundles, and Lie groups.

II: Qualitative Studies of Linear Equations

1996. Approx. 545 pages. 13 figures (Applied Mathematical Sciences, Vol. 116). Hardcover DM 98,– ISBN 0-387-94651-9

Contents: 7) Pseudodifferential operators; 8) Spectral theory; 9) Scattering by obstacles; 10) Dirac operators and index theory; 11) Brownian motion and potential theory; 12) The partial Neumann problem; Apendix C: Connections and curvature.

III: Nonlinear Equations

1996. Approx. 650 pages. 65 figures (Applied Mathematical Sciences, Vol. 117). Hardcover DM 98,–
ISBN 0-387-94652-7

Contents: 13) Function space and operator theory for nonlinear analysis; 14) Nonlinear elliptic equations; 15) Nonlinear parabolic equations; 16) Nonlinear hyperbolic equations; 17) Euler and Navier-Stokes equations for incompressible fluids; 18) Einstein's equations
