

Submitting manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French or German. The submission of a paper implies the author's assurance that it has not been published or submitted for publication elsewhere.

Submit two copies of your manuscript, double spaced, to the Illinois Journal of Mathematics, 1409 West Green St., University of Illinois, Urbana, Illinois 61801 (ijm@math.uiuc.edu) or directly to one of the editors listed on the inside front cover.

Include your e-mail address with your covering letter.

Sending electronic files

Once your paper is accepted you will be given instructions for sending your electronic file, to be used in the typesetting process. But do not send any electronic files until then. We prefer a version of \TeX but can use any electronic files, including ChiWriter, T³, WordPerfect and Microsoft Word.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for \$40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

	Page
Regularity of pairs of positive operators By SHANGQUAN BU, PHILIPPE CLÉMENT and SYLVIE GUERRE-DELABRIÈRE	357
Sobolev and Hölder estimates for $\bar{\partial}$ on bounded convex domains in \mathbb{C}^2 By DEYUN WU	371
Linear isometries between certain subspaces of continuous vector-valued functions By JUAN J. FONT	389
Structure of foliations on 2-manifolds By HABIB MARZOUGUI	398
An invariant mean value property in the polydisc By JAESUNG LEE	406
Golomb's self-described sequence and functional differential equations By Y.-F.S. PÉTERMANN and JEAN-LUC RÉMY	420
Failure of F-purity and F-regularity in certain rings of invariants By ANURAG K. SINGH	441
Bifurcation sets of functions definable in \mathcal{o} -minimal structures By TA LÊ LOI and ALEXANDRU ZAHARIA	449
Bergman and Hardy spaces on model domains By FRIEDRICH HASLINGER	458
A generalized H^∞ functional calculus for operators on subspaces of L^p and application to maximal regularity By GILLES LANCIEN and CHRISTIAN LE MERDY	470
A partial connection on complex Finsler bundles and its applications By TADASHI AIKOU	481
Hankel operators and Bergman projections on Hardy spaces By WILLIAM S. COHN	493
Lexsegment ideals with linear resolution By ANNETTA ARAMOVA, EMANUELA DE NEGRI and JÜRGEN HERZOG	509
