

# ILLINOIS JOURNAL OF MATHEMATICS

Volume 54, Number 1

Spring 2010

---

<b>Ilya Kapovich</b> , On mathematical contributions of Paul E. Schupp.....	1
<b>Paul E. Schupp</b> , A strengthened freiheitssatz .....	11
<b>Eric Jaligot and Zlil Sela</b> , Makanin–Razborov diagrams over free products...	19
<b>Jon McCammond and Daniel Wise</b> , Windmills and extreme 2-cells .....	69
<b>Ilya Kapovich and Martin Lustig</b> , Domains of proper discontinuity on the boundary of Outer space .....	89
<b>Murray Elder</b> , A linear-time algorithm to compute geodesics in solvable Baumslag–Solitar groups .....	109
<b>Vincent Guirardel and Gilbert Levitt</b> , Computing equations for residually free groups .....	129
<b>Jon McCammond</b> , Combinatorial descriptions of multi-vertex 2-complexes ...	137
<b>Marie-Pierre Béal, Sylvain Lombardy and Dominique Perrin</b> , Embeddings of local automata .....	155
<b>Enric Ventura</b> , Computing fixed closures in free groups .....	175
<b>Vladimir Shpilrain</b> , Sublinear time algorithms in the theory of groups and semigroups .....	187
<b>Jorge Almeida, Stuart Margolis, Benjamin Steinberg and Mikhail Volkov</b> , Characterization of group radicals with an application to Mal'cev products .....	199
<b>Warren Dicks and S. V. Ivanov</b> , On the intersection of free subgroups in free products of groups with no 2-torsion .....	223
<b>Ruth Charney, Kim Ruane, Nathaniel Stambaugh and Anna Vijayan</b> , The automorphism group of a graph product with no SIL.....	249
<b>François Bergeron and Christophe Reutenauer</b> , $SL_k$ -tilings of the plane..	263
<b>Victor Guba and Mark Sapir</b> , On the conjugacy growth functions of groups	301
<b>Gilbert Baumslag</b> , Some reflections on proving groups residually torsion-free nilpotent. I.....	315
<b>Igor Rivin</b> , Growth in free groups (and other stories)—twelve years later .....	327
<b>Robert Gilman, Alexei Miasnikov and Denis Osin</b> , Exponentially generic subsets of groups .....	371
<b>Emmanuel Breuillard and Yves de Cornulier</b> , On conjugacy growth for solvable groups .....	389
