

# NOTRE DAME JOURNAL OF FORMAL LOGIC

VOLUME 28, 1987

## VOLUME CONTENTS

<b>Anderson, C. Anthony</b> , Semantical antimonies in the logic of sense and denotation	99–114
<b>Bell, David</b> , Thoughts	36–50
<b>Bull, R. A.</b> , Survey of generalizations of Urquhart semantics	220–237
<b>Burrieza, A. and Juan C. León</b> , Modal trees: Correction to a decision procedure for $S5$ (and $T$ )	385–391
<b>Butrick, Richard</b> , A system of predicate logic with trans-atomic units	431–438
<b>Currie, Gregory</b> , Remarks on Frege's conception of inference	55–68
<b>Daniels, Charles B.</b> , A first-order logic with no logical constants	408–413
<b>Doets, Kees</b> , On $n$ -equivalence of binary trees	238–243
<b>Flannery, Kevin L.</b> , A rationale for Aristotle's notion of perfect syllogisms	455–471
<b>Gold, Bonnie</b> , Relatively diophantine correct models of arithmetic	291–296
<b>Goodman, Nicolas D.</b> , Intensions, Church's Thesis, and the formalization of mathematics	473–489
<b>Hand, Michael</b> , <i>Other</i> and <i>Else</i> : Restrictions on quantifier domains in game-theoretical semantics	423–430
<b>Helman, Glen</b> , On the equivalence of proofs involving identity	297–321
<b>Hill, Christopher S.</b> , Rudiments of a theory of reference	200–219
<b>Howard, Paul E. and Mary Yorke</b> , Maximal $P$ -subgroups and the axiom of choice	276–283
<b>Hugly, Philip and Charles Sayward</b> , Do we need models?	414–422
<b>Humberstone, I. L.</b> , The model logic of "all and only"	177–188
<b>Jurcic, Joseph</b> , On defining sentential connectives	189–199
<b>Kapetanović, Miodrag and Aleksandar Krapež</b> , More on trees and finite satisfiability: The taming of terms	392–394

<b>Kleene, Stephen C.</b> , Reflections on Church's Thesis	490–498
<b>Krapež, Aleksandar and Miodrag Kapetanović</b> , More on trees and finite satisfiability: The taming of terms	392–394
<b>Kreisel, Georg</b> , Church's Thesis and the ideal of informal rigour	499–519
<b>León, Juan C. and A. Burrieza</b> , Modal trees: Correction to a decision procedure for S5 (and T)	385–391
<b>Martinez, Juan Carlos</b> , Decision procedure for a class of $(L_{\omega_1\omega})_T$ -types of $T_3$ spaces	284–290
<b>McCarthy, Timothy and Stewart Shapiro</b> , Turing projectability	520–535
<b>McCarty, Charles</b> , Variations on a thesis: Intuitionism and computability	536–580
<b>Mendelsohn, Richard L.</b> , Frege's two senses of "Is"	139–160
<b>Moore, A. W. and Andrew Rein</b> , Frege's permutation argument	51–54
<b>Nelson, R. J.</b> , Church's Thesis and cognitive science	581–614
<b>Parsons, Terence</b> , On the consistency of the first-order portion of Frege's logical system	161–168
<b>Powers, Lawrence</b> , Quantifier responsiveness	322–355
<b>Rein, Andrew and A. W. Moore</b> , Frege's permutation argument	51–54
<b>Russinoff, I. Susan</b> , On the brink of a paradox?	115–131
<b>Sayward, Charles and Philip Hugly</b> , Do we need models?	414–422
<b>Schroeder-Heister, Peter</b> , A model-theoretic reconstruction of Frege's permutation argument	69–79
<b>Shanker, S. G.</b> , Wittgenstein versus Turing on the nature of Church's Thesis	615–649
<b>Shapiro, Stewart and Timothy McCarthy</b> , Turing projectability	520–535
<b>Slaney, John K.</b> , Reduced models for relevant logics without WI	395–407
<b>Sluga, Hans</b> , Frege against the Booleans	80–98
<b>Smoryński, C.</b> , Quantified modal logic and self-reference	356–370
<b>Tapscott, Bangs L.</b> , A simplified natural deduction approach to certain modal systems	371–384
<b>Toffalori, Carlo</b> , Cantor-Bendixson spectra of $\omega$ -stable theories	259–275

<b>Wagner, Steven J.</b> , The rationalist conception of logic	3–35
<b>Williamson, Timothy</b> , Invertible definitions	244–258
<b>Wilson, Fred</b> , The distribution of terms: A defense of the traditional doctrine	439–454
<b>Yorke, Mary and Paul E. Howard</b> , Maximal $P$ -subgroups and the axiom of choice	276–283
<b>Yourgrau, Palle</b> , Frege on truth and reference	132–138
