ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 34 Spring 2004 Number 1

CONTENTS

Spectral Properties of the Nonhomogeneous Klein-Gordon s-Wave Equations
By Elgiz Bairamov 1

Three-Descent and the Birch and Swinnerton-Dyer Conjecture
By Andrea Bandini 13

Extended Hadamard Products, Trigonometric Integrals and Associated Sums
By L.R. Bragg 29

Ring Decompositions Induced by Certain Lie Ideals
By Leonard Casciotti 43

A New Class of Normed Spaces with Nontrivial Groups of Isometries and Some Estimates for Operators with Given Action
By B.L. Chalmers and M.I. Ostrovskii 59

Hereditarily Unicoherent Continua and Their Absolute Retracts
By Janusz J. Charatonik, Włodzimierz J. Charatonik and Janusz R. Prajs 83

Archimedean Closed Lattice-Ordered Groups
By Yuanqian Chen, Paul Conrad and Michael Darnel 111

Spectral Estimates for the Commutator of Two-Dimensional Hilbert Transformation and the Operator of Multiplication with a C^1 Function
By M.R. Dostanić 125

A Survey on Recent Advances on the Nikodým Boundedness Theorem and Spaces of Simple Functions
By J.C. Ferrando and L.M. Sánchez Ruiz 139

A Criterion for Linear Independence of Series
By Jaroslav Hančl 173

Linear Combinations of Isometries
By Ximena Catepilláan and Waclaw Szymanski 187

The Dirichlet Problem for Quasimonotone Systems of Second Order Equations
By Gerd Herzog 195

Cohen-Macaulayness of Tensor Products
By Leila Khatami and Siamak Yassemi 205

CONTENTS CONTINUED ON INSIDE BACK COVER

Weak Symmetry in Naturally Reductive Homogeneous Nilmanifolds
By Jorge Lauret 215

Finite Reflection Groups and Linear Preserver Problems
By Chi-Kwong Li, Ilya Spitkovsky and Nahum Zobin 225

Generic Formal Fibers of Polynomial Ring Extensions
By S. Loepp and C. Rotthaus 253

A Note on the Curve $Y^2 = (X + p)(X^2 + p^2)$
By Allan J. MacLeod 263

Almost Skew-Symmetric Matrices
By J.J. McDonald, P.J. Psarrakos and M.J. Tsatsomeros 269

On the H-Polynomial of Certain Monomial Curves
By D.P. Patil and G. Tamone 289

Kernel Groups and Nontrivial Galois Module Structure of Imaginary Quadratic Fields
By Daniel R. Replogle 309

The Mapping Properties for a Class of Oscillatory Integrals
By G. Sampson 321

Unique Solvability of an Ordinary Free Boundary Problem
By Uwe Schäfer 341

On Distortion under Quasiconformal Mapping
By Alexander Vasil'ev 347

A Change of Scale Formula for Wiener Integrals of Unbounded Functions
By I. Yoo, T.S. Song, B.S. Kim and K.S. Chang 371
