CONTENTS

Great Plains Operator Theory Conference

Preface
By NORBERTO SALINAS 261

Noncommutative random variables and spectral problems in free product
 C^* -algebras
By D. VOICULESCU 263

Rational C^* -algebras and nonstable K -theory
By B. BLACKADAR 285

Problems about reflexive algebras
By K. DAVIDSON 317

Tensor products of non-self-adjoint operator algebras
By V. PAULSEN And S. POWER 331

Cauchy products of positive sequences
By M. BADRI And P. SZEPTYCKI 351

Interpolation of bounded operators on Lebesgue spaces
By B. BARNES 359

On perturbations of reflexive algebras
By H. BERCOVICI And F. POP 379

A classification of some noncommutative Tori
By B. BRENKEN 389

Hyponormal and quasinormal weighted composition of operators on l^2
By J. CARLSON 399

Affine geometric proofs of the Banach Stone theorems of Kadison and Kaup
By T. DANG, Y. FRIEDMAN And B. RUSSO 409

Invariant subspaces and thin sets
By J. FROELICH 429

Lifting Hankel operators from the Hardy space to the Bergman space
By P. GHATAGE 433

Algebra is everywhere
By R. HARTE 439

On the multiplicity of $T \oplus T \oplus \cdots \oplus T$
By D. HERRERO And W. WOGEN 445

A bi-measurable transformation generated by a non-measure
transformation
By A. LAMBERT 467

On the equivalence of the operator equations $xa + ba = c$ and
 $X - p(-B)Xp(A)^{-1} = W$ in a Hilbert space, p a polynomial
By T. MAZUMDAR And D. MILLER 477

Bimodules over Cartan subalgebras
By R. MERCER 489

Duality type results and ergodic actions of simple life groups on operator
algebras
By C. PELIGRAD 505

CONTENTS CONTINUED ON BACK PAGE

Invertibility and topological stable rank for semi-crossed product algebras By J. PETERS	513
<i>AF</i> subalgebras of certain crossed products By Y.T. POON	529
On spectral properties of almost Mathieu operators and connections with irrational rotation C^* -algebras By N. RIEDEL	541
On exact controllability of operators By L. RODMAN	551
Direct integrals of standard forms of W^* -algebras By L. SCHMITT	563
The spatial form of antiautomorphisms of von Neumann algebras By E. STORMER	575
On almost commuting Hermitian operators By S. SZAREK	583
The boundedness condition of dilation theory characterizes subnormals and contractions By W. SZYMANSKI	591
Removing the Jump-Kato's decomposition By T.WEST	603
Restrictions of essentially normal operators By L. WILLIAMS	613
Derivations from subalgebras of operator algebras: results and problems old and new By S. WRIGHT	619
A note on the cyclic cohomology and K -theory associated with difference operators By D. XIA	637
Entropy of certain noncommutative shifts By H. YIN	649
