

CONTENTS

Limit behavior of Sobolev flux boundary control problems	
By L.W. WHITE	383
Markov operators and invariant Baire functions	
By ROBERT E. ATALLA	397
Non-uniqueness for nonlinear boundary-value problems	
By E.N. DANCER	401
A class of negative-amphicheiral knots and their Alexander polynomials	
By JAMES M. VAN BUSKIRK	413
On the structure of torch rings	
By ALBERTO FACCHINI	423
Distributive, modular and separating elements in lattices	
By P.R. JONES	429
A brief survey and history of asymptotic prime divisors	
By L.J. RATLIFF, JR.	437
A q -extension of Bailey's bilinear generating function for the Jacobi polynomials	
By H.M. SRIVASTAVA	461
Convex polytopes and retractions of Abelian groups	
By WALTER S. SIZER	467
Krull dimension of differential operator rings II: the infinite case	
By T.H. LENAGAN	475
On Haar measure of certain hypercomplex unitary groups	
By D.G. KABE	481
Remarks on hypernormal trigonometric Toeplitz operators	
By PENG FAN	489
On theorems of B.H. Neumann concerning FC-groups, II	
By V. FABER AND M.J. TOMKINSON	495
On function with Weierstrass boundary points everywhere	
By D.M. CAMPBELL AND J.S. HWANG	507
Locally Σ -spaces	
By A.J. LEDGER	513
A classical Banach space: ℓ_∞/c_0	
By I.E. LEONARD AND J.H.M. WHITFIELD	531
On the S-equivalence of some general sets of matrices	
By PATRICK W. KEEF	541
