

STATISTICAL SCIENCE

a review journal of the institute of mathematical statistics

Volume 1

Number 1

February 1986

Featuring

**D. A. Freedman and W. C. Navidi on
MODELS FOR ADJUSTING THE CENSUS**

B. Efron and R. Tibshirani on THE BOOTSTRAP

**L. Le Cam on
THE CENTRAL LIMIT THEOREM AROUND 1935**

**S. Geisser on
THE COLLECTED WORKS OF GEORGE E. P. BOX**

**C. Genest and J. V. Zidek on
COMBINING PROBABILITY DISTRIBUTIONS**

**interviews with
DAVID BLACKWELL and T. W. ANDERSON**

The aim of *Statistical Science* is to present the full range of contemporary statistical thought at a technical level accessible to the broad community of practitioners, teachers, researchers, and students of statistics and probability.

The journal will publish discussions of methodological and theoretical topics of current interest and importance, surveys of substantive research areas with promising statistical applications, comprehensive book reviews, discussions of classic articles from the statistical literature, and interviews with distinguished statisticians and probabilists.

SUBMISSION POLICY

Statistical Science welcomes the submission of expository, review, and survey papers in all areas of the theory, methodology, and applications of statistics and probability. Articles that synthesize research that has been published in diverse sources or that has been developed from diverse points of view are especially valuable.

Four nonreturnable copies of any manuscript submitted for consideration are requested for the reviewing process. Copies should be mailed first class to:

Professor Morris H. DeGroot
Executive Editor, *Statistical Science*
Department of Statistics
Carnegie-Mellon University
Pittsburgh, PA 15213

The manuscripts should be typed on $8\frac{1}{2} \times 11$ -inch white paper, on one side only, and double-spaced throughout, including the references, with margins of at least $1\frac{1}{2}$ inches on all four sides. Pages should be numbered consecutively. The manuscript should contain an abstract of 200 or fewer words, followed by approximately 5 or 6 key words or phrases. A short author's note providing the name, address, present position or rank, and affiliation of each author should also be included.

A condition of submission is that the manuscript has not previously been published and is not simultaneously being considered for publication elsewhere.

Statistical Science is copyrighted and authors will be asked to sign a copyright transfer to the IMS before publication.
