	Page
H. ŌIKE, Simply connected closed smooth 5-manifolds with effective smooth $U(2)$ -actions	1
V. COSSART, Desingularization of embedded excellent surfaces.....	25
A. HATTORI, Some arithmetical applications of groups $H^q(R, G)$	35
H. KOJIMA, Siegel modular cusp forms of degree two.....	65
T. KIZUKA, Analytic automorphisms of the complement of an algebraic curve in the complex projective plane.....	77
M. GLASNER AND M. NAKAI, A note on images of reduction operators	91
T. SHIMANO, On helices and multiple Wiener integrals of a Gaussian automorphism	103
T. NISHISHIRAHO, Quantitative theorems on linear approximation processes of convolution operators of Banach spaces	109
E. GOYA AND T. SAITÔ, On intertwining by an operator having a dense range	127
G. OSHIKIRI, A remark on minimal foliations	133
S. SATO, A note on a Fourier multiplier of two variables.....	139
