

TÔHOKU MATHEMATICAL JOURNAL

東北數學雜誌

(FOUNDED BY T. HAYASHI)

EDITED BY

SHIGEO SASAKI GEN-ICHIRO[^]SUNOUCHI TADAO TANNAKA

WITH THE CO-OPERATION OF THE

MATHEMATICAL INSTITUTE OF TÔHOKU UNIVERSITY

AND

HITOSHI HOMBU SHIN-ICHI IZUMI

YUKIYOSI KAWADA ATUO KOMATU

MOTOKITI KONDÔ KIYOSHI NOSHIO

KÔSAKU YOSIDA

SECOND SERIES, VOL. 5,

1958³

THE TÔHOKU UNIVERSITY

SENDAI, JAPAN

CONTENTS

Volume 5, 1953

	Page
AOKI, K., On some invariants of mappings	220
CARLITZ, L., Hankel determinants and Bernoulli numbers.....	272
CHOW, Y. S., On the Cesàro summability of double Fourier series ..	277
HIROKAWA, H. and SUNOUCHI, G., Two theorems on the Riemann summability	261
IZUMI, S., Some Trigonometrical Series, IV	18
IZUMI, S., On an approximation problem in the theory of probability..	22
IZUMI, S., Some Trigonometrical Series, V	29
IZUMI, S., MATSUYAMA, N. and TSUCHIKURA, T., Notes on Fourier Analysis (XLIX): Some negative examples	43
IZUMI, S., Some Trigonometrical Series VII.....	268
IZUMI, S., Some Trigonometrical Series VI	290
IZUMI, S., Some Trigonometrical Series VIII.....	296
KOIZUMI, S. and SUNOUCHI, G., Generalized Fourier integrals.....	243
KUNIYOSHI, H. and TAKAHASHI, S., On the principal genus theorem ..	128
MASUDA, K., Note on conservative algebraic function fields	12
MATSUYAMA, N., IZUMI, S. and TSUCHIKURA, T., Notes on Fourier Analysis (XLIY): Some negative examples	43
MIYAZAKI, H., The cohomotopy and uniform cohomotopy groups	83
MIYAZAKI, H., On generalizations of Hopf's classification theorems..	284
NAKAMURA, M. and TAKEDA, Z., Normal states of commutative operator algebras	109
NAKAMURA, M., TAKEDA, Z. and TURUMARU, T., On some extended principal axis theorems for completely continuous operators....	190
NOGUCHI, H., On isotopy. 1.	104
OKUMA, T., On certain system of orthogonal step functions (1)	166
RILEY, J. D., Contributions to the theory of functions of a bicomplex variable	132
SASAYAMA, H., On the generalized invariant differential form on manifolds with general connection	122
SUNOUCHI, G., Tauberian theorem for Riemann summability.....	34
SUNOUCHI, G., Correction: Tauberian theorems for Riemann Summability	189
SUNOUCHI, G., Cesàro summability of Fourier series	198
SUNOUCHI, G., A new convergence criterion for Fourier series	238
SUNOUCHI, G. and KOIZUMI, S., Generalized Fourier integrals	243
SUNOUCHI, G. and HIROKAWA, H., Two theorems on the Riemann summability	261
TAKAHASHI, S., Homology groups in class field theory	8

TAKAHASHI, Š, and KUNYOSHI, H., On the principal genus theorem ..	128
TAKAHASHI, S., Dimension of compact groups and their representations	178
TAKEDA, Z. and NAKAMURA, M., Normal states of commutative operator algebras	109
TAKEDA, Z., NAKAMURA, M. and TURUMARU, T. On some extended principal axis theorems for completely continuous operators....	190
TANAKA, C., Note on Dirichlet Series (V) : On the integral functions defined by Dirichlet series (1).....	67
TERADA, F., A note on the principal genus theorem	211
TSUCHIKURA, T., IZUMI, S. and MATSUYAMA, N., Notes on Fourier Analysis (XLIX) : Some negative examples	43
TUCHIKURA, T., Absolute Cesàro summability of orthogonal series ..	52
TUCHIKURA, T., Absolute Cesàro Summability of orthogonal series II..	302
TSUJI, M., On covering surfaces of a closed Riemann surface of genus $p \geq 2$	185
TURUMARU, T., On direct-product of operator algebras, II	1
TURUMARU, T., NAKAMURA, M. and TAKEDA, Z.. On some extended principal axis theorems for completely continuous operators....	190
WADA, H., Irrtümer.....	313
WATANABE, H., Une remarque sur l'uniformisation des ensembles analytiques plans	79
YAMASHTIA, C., An elementary and purely synthetic proof for the double six theorem of Schläfli.....	215
YANO, S., A remark on absolute Cesàro summability of Fourier series	194
YANO, S., Cesàro summability of Fourier series	196

Reprints of
"THE TOHOKU MATHEMATICAL JOURNAL"

The Tohoku Mathematical Journal was originally planned and issued continuously by the late Dr. Tsuruichi Hayashi, Professor Emeritus of the Tohoku University till Vol. 9, No. 3 on his own account, as a publication of the Tohoku University, and after completing the first Series with Vol. 49, the second Series are now being issued.

It was Dr. Hayashi's editorial policy to make an international mathematical journal of the highest level, by collecting manuscripts of the leading mathematicians at home and abroad, and thereby not only to contribute to the progress and development of mathematics but also to introduce the true worth of Japanese mathematics to the learned circles all over the world.

This purpose was achieved most satisfactorily by Dr. Hayashi's profound knowledge, broad vision and refined character with the devotional cooperation of Dr. Matsusaburo Fujiwara, Dr. Jun Ishihara, Dr. Tadahiko Kubota, Dr. Soichi Kakeya and Dr. Kinnosuke Ogura.

There is no need to dwell upon the value of this journal, which is indeed an immortal work in mathematics. Despite the demands from all over the world, however, it was quite difficult to obtain a complete set of the work, especially Vols. 1 through 10, due to the small numbers published.

It is our great pleasure to announce that with the ready consents of Dr. Hayashi's family and the Tohoku University we have taken up the publication of a reprint of a limited number of this journal to meet the ardent demands, and sincerely hope that you will not lose this rare opportunity of gaining possession of this valued work.

Volume I-III is now ready. U. S. \$ 7.00

(Succeeding Volumes will be published monthly)

Sole Agent,

MARUZEN COMPANY, LIMITED

P. O. Box 605 Central, Tokyo, Japan.
